Welcome and Introduction

Welcome to FdSc Assistant Practitioner: Health and Social Care programme delivered at the North Devon Campus by Petroc College of Further and Higher Education.

The rapidly changing nature of health and social care service provision within the UK demands a highly skilled, integrated multidisciplinary workforce which is flexible adaptable and proactive in the way in which it provides compassionate and high quality care. Changing demographics and social dynamics along with an orientation towards care closer to home and place based models of care requires an increase in knowledgeable, caring and multi skilled support workers who can work in integrated health and social care environments where the range of medical conditions and multiple morbidities are complex and wide ranging.

The Assistant Practitioner: Health and Social Care foundation degree provides a sound and critical understanding of health and social care policy, theory and practice, and will provide the learner with the underpinning Core Assistant Practitioner Standards required by Skills for Health and which are needed for effective practice in a diverse, multidisciplinary 21st Century integrated healthcare environment.

Core concepts surrounding health and wellbeing will be critically explored in light of increasing levels of obesity and the subsequent rise in morbidity levels associated with conditions such as coronary heart disease, diabetes, stroke and dementia.

The values of the NHS Constitution are embedded in our programme of study, where patients come first and the respect and dignity of all patients is protected by the application of compassionate, person-centred, highly skilled practitioner based multidisciplinary care.

The Assistant Practitioner: Health and Social Care foundation degree will enable learners who do not want to move out of the North Devon area to become fully qualified Assistant Practitioners. The programme of study is designed to enable individuals to support the work of registered health and social care professionals with a level of knowledge and skill beyond that of the traditional band 2 and 3 support worker or healthcare assistant roles and qualify students to band 4 level.

It is both a theoretical and competency based course of study and from the very beginning of the course learners will be working alongside a wide range of other learners and professional practitioners who will have different backgrounds both in terms of education and aspirations thus providing opportunities to develop collegiate relationships which will broaden their appreciation of the wide range of vocational opportunities within health and social care. Opportunities exist for learners local to the North Devon area to work with a selection of different healthcare professionals in multidisciplinary environments to establish outcomes linked to core standard.

At other times learners will share ideas and connections with their fellow learners thus developing a form of professional collegiality within a university environment which is highly relevant to the increasingly integrated and multidisciplinary healthcare economy of our region.

An additional distinctive feature of this programme of study is the way in which learners will be able to develop their professional practice and local healthcare expertise and therefore contribute to the economy of North Devon. The employability level of each learner will be enhanced by obtaining this degree. In a sector which is experiencing considerable change, and where local employers within health and social care need a highly versatile and critically aware workforce who can adapt and work effectively with a range of multi-skilled practitioners, learners on this programme of study will be highly qualified and greatly valued. The nurturing of a well-educated band 4 healthcare support workforce with economic and compassionate expectations contributes hugely to the potential of the area.

Ultimately, learners will leave with a developed and reflexive sense of practice and a professional qualification that will sustain them in a variety of health and social care roles for the rest of their career. Due to the nature of the programme, either two days full time or one day part time, learners will be able to integrate learning with the rest of their life, balancing their studies with work, home and leisure time. This is a real strength of the degree, the amount of control it gives each individual learner to be able to consider all of the demands of their life and then structure their time effectively in order to be able to meet these demands.

Petroc and Northern Devon Healthcare NHS Trust have signed a formal Memorandum of Understanding (MoU) surrounding the way in which the two organisations work together in a spirit of cooperation and collaboration. As part of the MoU the development of the FdSc Assistant Practitioner: Health and Social Care is fundamental to ensure the sustainability of Northern Devon Healthcare NHS Trust's future workforce needs. A core aspect of the foundation degree programme is the need to produce fully qualified Assistant Practitioners who can be directly employed by the trust in order to procure an assistant practitioner workforce which is work ready and who are able to be assimilated into future integrated and multi-disciplinary teams which work across both acute and community based health and social care settings.

Therefore, the FdSc Assistant Practitioner: Health and Social Care programme will have employability at the very core of its existence, be work based, employer led and have the Skills for Health six Core Standards for Assistant Practitioners embedded throughout. Students who enrol onto the programme will either be directly employed by the trust as trainee assistant practitioners (TAPs) or (if not employed via the trust) will have at the end of their programme of study the opportunity to be directly employed as a fully qualified Assistant Practitioner. As the programme of study has mandatory core practitioner based core standards/competencies linked to it, the students will be placed into health and social care environments where they will be working alongside fully qualified practitioners on a regular basis thus strengthening the employability link even further.

This programme has been designed to equip you with the skills and knowledge base required to work in your chosen specialism or other graduate opportunities. It is also a platform from which you can undertake additional vocational and academic qualifications.

This Programme Quality handbook contains important information including:

- The approved programme specification
- Module records

Note: The information in this handbook should be read in conjunction with the current edition of:

- Your University Student Institution Handbook which contains student support based information on issues such as finance and studying at HE available at:

2. Brief Description of the Programme

This text is definitively approved at programme approval and therefore may be directly used for promotion of the programme without the need for further confirmation (approx. 200-250 words):

The rapidly changing nature of health and social care service provision within the UK demands a highly skilled, multidimensional and multidisciplinary workforce which is flexible adaptable and proactive in the way in which it provides compassionate and high quality care. Changing demographics and social dynamics along with an orientation towards care closer to home requires an increase in knowledgeable, caring and multi skilled support workers who can work in integrated health and social care environments where the range of medical conditions and multiple morbidities are complex and wide ranging. The Assistant Practitioner: Health and Social Care foundation degree provides a sound and critical understanding of health and social care policy, theory and practice, and will provide the learner with both the Care Certificate and the underpinning Core Assistant Practitioner Standards required by Skills for Health. The broad range of theoretical and practice based skills included within the programme of study provide individuals with what is needed for effective practice in a diverse, multidisciplinary 21st Century integrated healthcare environment. Core concepts surrounding health and wellbeing will be critically explored in light of increasing levels of obesity and the subsequent rise in morbidity levels associated with conditions such as coronary heart disease, diabetes, stroke and dementia.

The values of the NHS Constitution are embedded in our programme of study, where patients come first and the respect and dignity of all patients is protected by the application of compassionate, person-centred, highly skilled practitioner based multidisciplinary care.

3. Details of Accreditation by a Professional/Statutory Body (if appropriate)

N/A

4. Exceptions to Plymouth University Regulations

(Note: Plymouth University's Academic Regulations are available on the extranet: <https://www.plymouth.ac.uk/student-life/academic-regulations>)

None

5. Programme Aims

The programme will deliver

A1: A contribution to the development of a skilled health and social care workforce in the South West region which is able to cope with the emerging challenges of an increasingly community based healthcare profession orientated towards a multidisciplinary integrated healthcare service

A2: A validation of the contribution of both academic and competency based vocational study towards both personal and professional development

A3: Effective engagement and collaboration with Northern Devon Healthcare NHS Trust in the design and delivery of programmes of study

A4: A balance between the rigour required for academic study, core competency completion and the capacity to efficiently and effectively respond to employer training and development needs

A5: Viable progression opportunities for students completing foundation degrees who might not otherwise have access to Honours level study including supporting part-time learners from diverse backgrounds

A6: A framework for the efficient and effective development of specialist optional module pathways in response to the needs of the Northern Devon Healthcare NHS Trust

A7: Opportunities for inter-personal learning and core competency achievement within a variety of specialist as well as integrated healthcare settings.

6. Programme Intended Learning Outcomes (ILO)

By the end of this programme you will be able to-

ILO1: Reflect on and demonstrate professional practice focusing on connecting and constructing knowledge. Within this reflection and demonstration consider the development of their own professional practice, examining their knowledge, skills, core competences, behaviours, attitudes and values and how these relate to the broader organisational and societal context

ILO2: Synthesise structures and methods of learning to establish the process of continuous professional development and reflective practice as a trainee assistant practitioner focusing on knowledge transfer and skill acquisition

ILO3: Utilise critical understanding focused on the development of transferable skills relevant to both academic study and to the workplace. At the core of this utilisation will be the evidencing, implementing and dissemination of knowledge as well as the demonstration of safe and effective core standards of practice

ILO4: Critically evaluate and analyse knowledge through the demonstration of an understanding of the concepts of health and wellbeing and health and social care practice

ILO5: Reflect upon their own practice; apply appropriate principles of research with theoretical knowledge to develop action plans for personal development, core standards and lifelong learning

ILO6: Demonstrate a critical understanding of the professional requirements relating to ethical practice within the discipline of Health and Social Care. (See Appendix 2)

7. Distinctive Features

The Assistant Practitioner: Health and Social Care foundation degree will enable learners who do not want to move out of the North Devon area to study health and social care with the intent of focusing their training towards gaining Assistant Practitioner status. The programme of study is designed to enable individuals to be able to support the work of registered health and social care professionals with a level of knowledge and skill beyond that of the traditional band 2 and 3 support worker or healthcare assistant roles and qualify students to band 4 level.

It is both a theoretical and competency based course of study and from the very beginning of the course learners will be working alongside a wide range of other learners and professional practitioners who will have different backgrounds both in terms of education and aspirations thus providing opportunities to develop collegiate relationships which will broaden your appreciation of the wide range of vocational opportunities within health and social care. Opportunities exist for learners local to the North Devon area to work with a selection of different healthcare professionals in multidisciplinary environments to establish outcomes linked to core standards. At other times learners will share ideas and connections with their fellow learners thus developing a form of professional collegiality within a university environment which is highly relevant to the increasingly integrated and multidisciplinary healthcare economy of our region.

An additional distinctive feature of this programme of study is the way in which learners will be able to develop their professional practice and local healthcare expertise and therefore contribute to the economy of North Devon. The employability level of each learner will be enhanced by obtaining this degree. In a sector which is experiencing considerable change, and where local employers within health and social care are in need of a highly versatile and critically aware workforce who can adapt and work effectively with a range of multi-skilled practitioners, learners on this programme of study will be highly qualified and greatly valued. The nurturing of a well-educated band 4 healthcare support workforce with economic and compassionate expectations contributes hugely to the potential of the area. Ultimately, learners will leave with a developed and reflexive sense of practice and a professional qualification that will sustain them in a variety of health and social care roles for the rest of their career.

Due to the nature of the programme, either two days full time or one day part time, learners will be able to integrate learning with the rest of their life, balancing their studies with work, home and leisure time. This is a real strength of the degree, the amount of control it gives each individual learner to be able to take into account all of the demands of their life and then structure their time effectively in order to be able to meet these demands.

8. Student Numbers

Minimum student numbers per stage = 15

Target student numbers per stage= 20

Maximum student numbers per stage= 30

9. Progression Route(s)

Approved 'progression route(s)' are those where successful achievement in this programme enables direct alignment to join a stage of another programme. This is an approach employed primarily for Foundation Degree students to 'top-up' to complete a Bachelor degree, but may be employed for other award types.

This is in part an automated admissions criterion and therefore progression may be impacted on by availability of a position on the progression award; however progression opportunity, if not available in the first year of application, is guaranteed within 3-years. Progression arrangements with institutions other than Plymouth University carry an increased element of risk. It is necessary for the delivering partner institution to obtain formal agreement from that institution to guarantee progression for existing students on the programme. For progression to Plymouth University, should there be the need to withdraw the progression route programme(s) then either this will be delayed to provide progression or appropriate solutions will be found. This arrangement is guaranteed for existing students that complete their programme of study with no suspensions or repeat years and who wish to progress immediately to the University.

There is a progression route available to students wishing to complete their full Honours degree. Petroc offer the full and part time level 6 BA (Hons) Professional Development (Health and Social Care) programme of study at the Brannams Campus and Mid Devon Campus;

<https://www.petroc.ac.uk/content/courses/health-social-care/ba-hons-professional-development-health-and-social-care>

<https://www.petroc.ac.uk/content/courses/health-social-care/ba-hons-professional-development-health-and-social-care1>

The contribution of marks from prior levels of study to the progression award is governed by University regulations.

10. Admissions Criteria

Qualification(s) required for entry of this programme.	Details
Level 2 1. Key skills requirements/ diploma levels And/or 2. GCSEs required at C or above	GCSE Maths and English at Grade D or above will be considered along with any other equivalent level 2 qualifications
Level 3- At least one of the following 3. AS/A Levels 4. Advanced Diploma 5. BTEC/National Certificate diploma 6. VDA:AGNVQ:AVCE:AVS 7. Access to HE or year 0 provision 8. International Baccalaureate 9. Irish/Scottish Highers, British Highers	All level 3 qualifications will be considered and in addition all applicants will be interviewed. Appropriate subject areas will normally be in the discipline of health and social care, however qualifications in others subjects may be considered and discussed at interview.
Work experience	Considered on individual merit
Other HE qualifications/ non- standard awards or certificates.	Applicants from other Health & Social Care foundation degrees who wish to enter the programme of study at level 5 will be considered on an individual basis. Appropriate subject areas will normally be in the discipline of health and social care, however qualifications in others subjects may be considered and discussed at interview.
APEL APCL4 Possibilities	Applicants for APEL/APCL will be dealt with on an individual basis. Students must apply for this through the Higher Education Office providing full details of the qualifications/experience they wish to be considered. Plymouth University regulations will apply to all applications. Direct entry onto level 5 of the programme of study by those individuals who have successfully gained a level 4 health and social care foundation degree will be considered on an individual basis.
Interview/ portfolio requirements	In order to continue the ethos of widening participation that is established in our FdA and FdSc programmes of study we feel that applicants with a proven record of experience as a health and social care practitioner at the correct level and who can demonstrate relevant experience through portfolio plus an

	interview may be eligible to enter the award. All relevantly qualified applicants will be interviewed
Independent Safeguarding Agency (ISA) / Disclosure and Barring Service (DBS) clearance required:	<p>Yes. This will be an additional cost to the applicant prior to commencing the course. Petroc will apply for each applicant and once each applicant receives their DBS Petroc will scrutinise the outcome. Whilst Petroc is awaiting the DBS outcome each applicant will be asked to submit a Criminal Records Self Declaration form in order to self-declare any previous or pending convictions. If any previous or pending convictions are declared the applicants Criminal Records Self Declaration form will be submitted to Petroc's Professional Issues Committee. A decision will be taken by the Committee and the offer of a place will not be confirmed until the outcome of the Committee is known and the fitness to practice of each applicant can be guaranteed.</p> <p>A mandatory Occupational Health Screening Assessment will also need to be undertaken by every applicant prior to the commencement of the programme of study. Currently there is no additional charge for this assessment.</p>

10. Academic Standards and Quality Enhancement

Subject External Examiners: The External Examiner for the FdSc Assistant Practitioner: Health and Social Care programme of study will be Lisa Lewy from University of Southampton. Lisa's background is very much linked with the development of healthcare practice degrees with NHS trusts and she would therefore be able to contribute extremely effectively from a sound base of both academic and vocational understanding.

Additional stakeholders specific to this programme: Student representation via an elected student representative will be a core method of obtaining objective feedback and constructive input on all elements of the student cohort experience whilst on the programme. The student representative will be involved in both the autumn and spring programme committee meetings where they will have an opportunity to meet with both the programmes External Examiner and the Academic Liaison Person. The input of the student representative will be an integral part of the quality assurance process for this programme of study. In addition to the course student representative, Petroc has a lead student representative who arranges regular student representative meetings where information from both the Petroc HE Coordinator and the student representatives is disseminated in a meaningful and productive manner in order to improve the whole Higher Education experience for students at Petroc.

Northern Devon Healthcare NHS Trust are closely connected with a number of national organisations which govern workforce development within healthcare and provide support, guidance and additional services to ensure a national and joined-up policy perspective surrounding the nature of workforce development and service delivery. Health Education England via its Local Education and Training Board (Health Education South West) provide guidance, support and funding for workforce development initiatives via the Widening University of Plymouth Academic Partnerships Programme

Quality Handbook UK
20-21 Page 12 of 144
Last Saved: 27/04/2022

Participation and Talent for Care strategies. Skills for Health and Skills for Care provide additional guidance and support in terms of innovation, workforce development programmes and core skills competences for the band four assistant practitioner support worker role.

In addition, further stakeholder input via local employers from the health and social care sector liaise with Petroc and Northern Devon Healthcare NHS Trust on a regular basis via a strategic overview committee and four sub-groups. Further stakeholder input is generated via an additional steering committee organised and managed by Petroc which coordinates the Care Learning Exchange Network (CLEN). The CLEN culminates in a yearly networking conference held at Petroc where health and social care practitioners and employers such as Devon County Council, other NHS Trusts and care organisations from the Devon area and hopefully in the future the Care Home Education Forum meet and share good practice, disseminate sector specific knowledge via a selection of workshops and lectures. In addition to this network, further input from the North Devon NHS Mental Health Link Centres via their Devon Recovery Learning Community Training Resources will enable FdSc Assistant Practitioner: Health and Social Care students to access free mental health training courses throughout the year.

As an additional employability link for students on this programme a recent initiative with Northern Devon Healthcare NHS Trust has seen the development of a Care Academy overseen by the above mentioned strategic overview committee which will provide further progression opportunities for health and social care practice students once qualified to progress further within their career especially if they are looking towards nursing as their future profession.

PS1. Programme Structure²

The following structure diagram(s) provides the current structure for this programme:

Please Note: Optional modules are subject to availability as they may not all be available each academic year.

FHEQ level: 4 FdSc Assistant Practitioner: Health and Social Care Full Time				
F/T Route Year	When in Year? (i.e. Autumn, Spring etc.)	Core or Option Module	Credits	Module
1	Summer	Core	20	NORD 1128 Foundations of Health and Social Care Practice
1	Spring	Core	20	NORD 1124 Human Growth and Development
1	Spring	Core	20	NORD 1125 Concepts of Health and Wellbeing
1	Autumn	Core	20	NORD 1126 Vocational Competence in Health and Social Care Practice
1	Autumn	Core	20	NORD 1127 Understanding Practice
1	Summer	Core	20	NORD 1105 The Patient Journey and Care Process
FHEQ level: 5 FdSc Assistant Practitioner: Health and Social Care Full Time				
F/T Route Year	When in Year? (i.e. Autumn, Spring etc.)	Core or Option Module	Credits	Module
2	Autumn	Core	20	NORD 2107 Evidence Based Practice
2	Summer	Core	20	NORD 2108 Clinical Competence and Patient Assessment
2	Summer	Core	20	NORD 2109 Leadership and Ethics in Practice

² The provided table includes only a single line. This should be multiplied by copying and pasting to produce the correct number of modules for the level of the programme. For ease of consideration and clarity, please include a separate table for each level by again copying and pasting this table. Colour coding/ shading may be used to differentiate between new modules and existing approved modules shared with other programmes.

2	Autumn	Core	20	NORD 2110 Public Health and Health Promotion
2	Spring	Option	20	NORD 2111 Long Term Conditions
2	Spring	Option	20	NORD 2112 Dementia and Cognitive Dysfunction

Dates for External Examiner and ALP (Academic Liaison Person) from Plymouth University to be announced.

11. Explanation and Mapping of Learning Outcomes, Teaching & Learning and Assessment³

Developing graduate attributes and skills, at any level of HE, is dependent on the clarity of strategies and methods for identifying the attributes and skills relevant to the programme and where and how these are operationalized. The interrelated factors of Teaching, Learning and Assessment and how these are inclusive in nature, are fundamentally significant to these strategies and methods, as are where and how these are specifically distributed within the programme.

Ordered by graduate attributes and skills, the following table provides a map of the above, plus an exposition to describe and explain the ideas and strategy of each. Therefore, subsequent to the initial completion for approval, maintenance of this table as and when programme structure changes occur is also important:

FHEQ level: 4					
Definitions of graduate attributes and skills specific to this programme.	Teaching and learning strategies/methods	Prog aims	Prog intened learning outcop mes.	Range of assessments	Related core downloads
Knowledge / Understanding: By the end of the programme the student will be able to demonstrate knowledge and understanding of: A broad knowledge base of health and social care and its terminology or discourse. And will be able to demonstrate awareness that areas of this knowledge base are open to ongoing debate and reformulation (SEEC Level 4 Descriptors for Higher Education (2010))	See below				

³ For programmes containing more than one FHEQ level of study, i.e. a bachelor programme with levels 4, 5 & 6, a separate map must be provided for each level. The table should be copied and pasted to enable this.

<p>SEEC Level 4 Descriptors for Higher Education (2010) and QAA Subject Benchmark Statements for Health Studies (2008)</p>					
<ul style="list-style-type: none"> • Demonstrate a sound knowledge base in selected subject areas that inform health, well-being, social questions, issues and problems. See Appendix 1

Appendix: 1. Learning, Teaching, Assessment Methods and Work Based Learning Guidance

Work Based Learning

Placements for non-NHS employed trainee assistant practitioners (TAPs) will be organised via the Petroc Care Academy Coordinator who will liaise with Northern Devon Healthcare NHS Trust senior ward managers to identify supernumerary placement positions. With the agreement of senior ward managers and workforce development education managers at Northern Devon Healthcare NHS Trust, placements will be allocated in a timely fashion prior to the start of the programme of study.

Petroc has a formal Work Placement Statement and Procedures policy available via the following link

<https://my.petroc.ac.uk/dashboard/panel/cms#/page/460236504> which details the formal process involved in securing work placements.

Each non Northern Devon Healthcare NHS Trust employed trainee assistant practitioner (TAP) will be provided with a Northern Devon Healthcare NHS Trust Honorary Contract and will be allocated a clinical supervisor and will be guided by the same professional and legal regulations as Trust employed staff are guided by. Due to the nature of supernumerary posts and the additional capacity issues associated with such positions, Petroc will provide each non-NHS employed TAP with an academic supervisor who will act as a student advocate and academic mentor. Such a position will provide each non-employed TAP with additional support and the academic supervisor will act as an advocate who will liaise with Trust staff and clinical supervisors to ensure that strong and productive working relationships are formed between the non-employed member of staff and the employed clinical staff.

Placements for NHS employed trainee assistant practitioners (TAPs) will be inherently embedded within their own working week and therefore any additional placements will not be necessary unless specifically requested for by the TAPs line manager. If such a request was submitted for an employee of the NHS the same principles for the allocation of placements for non-NHS employed TAPs would be implemented.

Work-based learning is embedded within 4 core modules and two optional modules of the FdSc Health and Social Care Practice (Assistant Practitioner) programme. Specific clinical placement experience will be available for those students via Petroc's partnership with the Northern Devon Healthcare NHS Trust. Work-based clinical placements will consist of one day a week (8 hour) for full time students and half-day (4 hour) for part-time students at the North Devon District Hospital which will be in addition to the taught modules of the programme (see table below). Such placements will consist of a variety of different clinical settings where students can explore core and optional modules. Students on the programme will be able to access these work placement opportunities via the Petroc Care Academy Coordinator who will work in collaboration with the FdSc Health and Social Care Practice (Assistant Practitioner) programme manager and both the Clinical Training Manager and the Workforce Lead Coordinator at Northern Devon Healthcare NHS Trust. The eight hours per week (FT)

or four hours (PT) spent on placement will enable students to gain the core standards for Assistant Practitioners outlined by Skills for Health and will inform the assessments within NORD 1126 Vocational Competence in Health and Social Care Practice, NORD 1127 Understanding Practice, NORD 1105 The Patient Journey and Care Process and NORD 2108 Clinical Competence and Patient Assessment plus the two optional modules.

In addition, both the Care Learning Exchange Network and Devon Recovery Learning Community opportunities, via professional networking and training courses, will facilitate evidence for the Concepts of Health and Wellbeing module in terms of informing students of cutting edge initiatives taking place in practice which could assist in both the Literature Review and the Concept Fair presentation and providing real-life reflective evidence for Foundations of Health and Social Care Practice, Understanding Practice, The Patient Journey and Care Process, Evidence Based Practice and Public Health and Health Promotion, modules.

Care Learning Exchange Network and Devon Recovery Learning Community Work-Based Learning Requirements (Optional Additional Hours)		
Modules	Full Time Study	Part Time Study
NORD 1128 Foundations of Health and Social Care Practice	3 hours	2 hours
NORD 1125 Concepts of Health and Wellbeing	3 hours	2 hours
NORD 1127 Understanding Practice	3 hours	2 hours
NORD 1105 The Patient Journey and Care Process	3 hours	2 hours
NORD 2107 Evidence Based Practice	3 hours	2 hours
NORD 2110 Public health & Health Promotion	3 hours	2 hours

It will be mandatory for all students who are given a conditional offer for the FdSc Assistant Practitioner: Health and Social Care programme to apply for a Disclosure and Barring Service (DBS) enhanced (with lists) check to ensure that they are safe to practice within health and social care settings where they will be in contact with vulnerable groups of individuals. Petroc will apply to the DBS for each applicant and once each applicant receives their DBS enhanced (with lists) check, Petroc will scrutinise the outcome. Whilst Petroc is awaiting the DBS outcome, each applicant will be asked to submit a Criminal Records Self Declaration form in order to self-declare any previous or pending convictions as there is a delay of around four weeks prior to receiving DBS results. If any previous or pending convictions are declared, the applicants Criminal Records Self Declaration form will be submitted to Petroc's Professional Issues Committee. A decision will be taken by the Committee and the offer of a place will not be confirmed until the outcome of the Committee is known and the fitness to practice of each applicant can be guaranteed. Work placements will only commence once DBS checks have been received and they have been scrutinised by

both Petroc and work placement organisations to ensure that applicants are fit to practice.

Work Based Learning Guidance Document

The Clinical Placement Induction and Work Based Learning Core Standards Portfolio guidance outlines the way in which the work based element of the FdSc Assistant Practitioner: Health and Social Care programme of study will be undertaken. The document will be available on the Petroc Moodle site and will cover the following areas:

- Professionalism
- Health and Safety at Work
- Code of Conduct
- Employer Agreement
- Validation of Core Standards
- Discrimination and Harassment Guidance
- Needs and Expectation Statement
- Employer Assessment Forms
- Core Standards Matrix Grids

Learning, teaching and assessment methods and strategies:

The methods and strategies detailed below for both part-time and full-time programmes of study are built around the need to incorporate a variety of methods to ensure all students are engaged and focussed. They are taken from established pedagogy and allow different learning styles to be used to try to ensure all students learn. Visual, oral, aural and kinaesthetic methods are all to be found in the methods and strategies employed within the modules. The focus will be on learning and helping the student develop into an independent autonomous learner and competent practitioner.

Knowledge and Understanding

Knowledge and understanding of health and social care practice is fundamental to the progression of students' professional development, education and abilities. The framework for building knowledge and understanding will be lectures where information is delivered by lecturers and clinical placements where students are observed in practice by qualified practitioners. Knowledge and understanding will be further developed by lecturers setting activities for students to prepare for seminars and practitioners setting tasks within the clinical environment. These activities will allow students to embed knowledge and deepen understanding. This may be through activities such as application questions; group work, presentations, healthcare based clinical tasks such as objective structured clinical examinations or preparation of discussions. Students will be expected to research primary and secondary health and social care sources, but also wider reading of newspapers and periodicals will be encouraged. To begin with, the activities undertaken by the student will be heavily directed by the lecturer/practitioner, but as the course progresses, students will be expected to undertake more responsibility to self-direct (with appropriate guidance from lecturers/practitioners). Seminars, clinical tasks and other small group work will allow students to develop confidence in their learning with

structured feedback from the lecturers/practitioners on the task and their performance.

At level 4, will be able to show knowledge and critical understanding of the well-established principles of health and social care practice and of the way in which those principles have developed. You will be able to apply your knowledge, understanding and skills within the context in which they were first studied, including in an employment context. You will also show that you can apply the main methods of enquiry in the subjects studied and evaluate critically the appropriateness of different approaches to solving problems in the field of study. In particular, you will have developed an ability to show that you have an understanding of the limits of your knowledge, and how this can influence your thoughts and decisions.

Your standard of communication in all the accepted forms related to your programme will be good and you will communicate well to a variety of audiences. You will be able to undertake further training, develop existing skills and acquire new competences so that you can assume significant responsibility within organisations. You will be able to show that you have qualities and transferable skills necessary for employment within the field of health and social care practice, and that you have developed significant levels of autonomy and abilities in decision-making.

Successful work at Level 5 will show that you can apply the knowledge, understanding and skills that you have developed at level 4 so that you can evaluate the appropriateness of different approaches to solving problems in some unpredictable situations. You will be able to show the qualities necessary for employment in situations requiring personal responsibility, autonomy and decision-making and that you can perform effectively in your chosen field.

You will be able to show knowledge and critical understanding of the well-established principles of the subjects you have studied and the core standards you have practiced and the way in which those principles have developed. You will be able to apply your knowledge, understanding and skills outside the context in which they were first studied, including in an employment context. You will also show that you can apply the main methods of enquiry in the subjects studied and evaluate critically the appropriateness of different approaches to solving problems in the field of study. In particular, you will have developed an ability to show that you have an understanding of the limits of your knowledge and core standards of practice, and how this can influence your thoughts and decisions.

Your standard of communication in all the accepted forms related to your programme will be good and you will communicate well to a variety of audiences. You will be able to undertake further training, develop existing skills and acquire new competences so that you can assume significant responsibility within organisations. You will be able to show that you have qualities and transferable skills necessary for employment, and that you have developed significant levels of autonomy and abilities in decision-making

Assessment is carried out through a variety of methods such as, case studies, coursework, essays, presentations, academic posters, reflective logs, workplace engagement, literature reviews, clinical observations, objective structured clinical

examinations etc. Formative work will also be undertaken to ensure that students are fully prepared for the summative assessments. All lecturers will ensure that students have the opportunity to practice on more than one occasion the type of assessment required in each module.

Cognitive and Intellectual skills

These skills are of vital importance to students in developing lifelong skills transferable to any situation within health and social care practice. In keeping with their importance, emphasis will be placed on them from the commencement of the course. It is important that students recognise the various components, such as description, analysis, critical evaluation and synthesis and undertake focussed activities to ensure their understanding and ability to translate theory into practice. Activities centred on seminar discussions and debates (for example how the impact of national policy affects regional and local activity especially within the field of health and social care practice) will build on knowledge whilst developing these skills.

Assessment is carried out in a variety of ways to prevent over emphasis on one or two particular skills. Problem questions, analysis, evaluation and critical evaluation, using the skills in oral applications, clinical tasks and through coursework will judge the students developing skills and also allow the students to be assessed in a balanced way, allowing students the opportunity to be assessed in ways which may play to their strengths.

It is recognised that these skills will need to be developed gradually over the 2 years of the full time route or 3 years of the part time route and therefore the detailed guidance that the students receive at level 4 will slowly reduce to enable the student to be far more independent and professionally competent by the end of level 5.

Key transferable skills

Clear and effective written communication skills are developed throughout both part-time and full-time programmes of study through the formative assessment of written and oral work. This work may take a variety of forms - essays, debates, presentations, reflective logs, academic posters, clinical observations, objective structured clinical examinations etc. At the commencement of the course, the attention of students will be drawn to the need for effective written and verbal communication in induction and this will be further developed through seminars and students own independent study.

Oral communication, written presentations, core clinical standards and reflection practice skills are central to this course and are encouraged through discussions, debate, clinical practice tasks as well as presentations the students will make.

Information Technology is an essential part of life today and students' skills will be developed through the requirement to submit work through word processed essays and even through more advanced techniques such as excel and computer generated activities.

Group work is encouraged at both level 4 & 5. Formative assessment will take place in all modules to ensure students understand what is required of them and also, as practitioner, peer and self-assessment will play a considerable role, how to critically

evaluate theirs and other students' performance. Students will undertake both individual and group presentations where they are required to give accurate peer assessment feedback, with guidance given by the lecturer to ensure fairness and accuracy. Group work is assessed at level 4 & 5 on both the part-time and full-time pathway to enable students to continue to develop and use essential employability skills.

A student as an independent and responsible learner is a key component of the course. At level 5 on both the part-time and full-time programme of study, it is anticipated that students will be increasingly autonomous especially in the planning, development and production of their final core standards of practice which involve a number of more autonomous tasks.

Practical and employment skills

Many of the key transferable skills are also practical and employment skills. However, the four chosen here are skills which are transferable to many forms of employment but are specifically aimed at key components of the role of assistant practitioner within the health and social care practice environment.

Learning is centred on the students' healthcare practice tasks whilst in the acute health and social care environment as well as the traditional classroom environment and also via their own independent study which is developed further via seminars. Lectures and clinical environments provide the framework for students who are then able to practise those skills. Tasks such as essay writing, presentations, dissertation proposals, academic posters, clinical tasks and reflective logs will provide learning and also formative and summative assessment opportunities.

At Level 5 the guidance and assistance given by lecturers/practitioners will be less than would be the case at level 4 in order to allow students to not only develop their standards of practice in a far more autonomous manner but also to develop their own styles of essay writing, reflective logs, academic posters and oral presentations.

By their nature, the skills are a vehicle for assessing other skills such as knowledge and understanding. Such assessments are done through reflective practice logs, observed subjective clinical examinations, clinical observations, practical course work (presentation) and written essay work.

Number of assessments

Possible further study at level 6 from this degree is possible and students may choose to progress to a level 6 top up BA/BSc Honours Professional Development (Health and Social Care) programme of study. Further employment opportunities outside the role of Assistant Practitioner to which this programme of study qualifies the individual to be available within the many areas of health and social care. Additional employment routes could also be found in education and business such as teaching assistants, school administration, county council business administration, special educational needs assistant etc. In consequence, to give students the widest possible skills and knowledge the intended learning outcomes (ILOs) are diverse and transferable. For example, the ability to present information and work effectively within a team is a key

graduate skill which is highly valued by the majority of employers and their organisations.

In addition to skills it is vital to know that students have had the ability to understand the knowledge and as such it is considered appropriate to assess this in every module. Therefore there are a number of different types of assessments within the programme.

Whilst there are a number of assessments, students will be working all year on a number of projects. Students' will not have all their assessments at the end of the year. Coursework will be spread across the academic year for both full and part-time students.

ASSESSMENT TABLE

LEVEL 4 (Full Time)

<u>YEAR AND CREDITS</u>	<u>NAME OF MODULE</u>	<u>TYPE OF ASSESSMENT AND OVERVIEW OF CONTENTS</u>	<u>LINK TO LEARNING OUTCOMES AND PROGRAMME OUTCOMES.</u>
Year 1 20 Credits	Foundations of Health and Social Care Practice	Presentation	LO 1 & 2, 30% Weighting
		Essay	LO 3, 4 & 5 70% Weighting
Year 1 20 Credits	Human Growth and Development	Essay	LO 1, 2 & 3 60% Weighting
		Biological Log	LO 4 & 5 40% Weighting
Year 1 20 Credits	Concepts of Health and Wellbeing	Literature Review	LO1, LO2 & LO3 60% Weighting
		Concept Fair Presentation	LO4 & LO5 40% Weighting
Year 1 20 Credits	Vocational Competence in Health and Social Care Practice	Critical vocational reflection	LO1 & LO3 50% Weighting
		Competency based personal and professional development portfolio/e-diary	LO2 & LO4 50% Weighting
Year 1 20 Credits	Understanding Practice	Reflective Case Study Journal	LO1, LO2, LO3, LO4 & LO6 70% Weighting
		Professional Practice and Competency Log	LO5 30% Weighting
Year 1 20 Credits	The Patient Journey and Care Process	Competency Based Academic Poster	LO1, LO2, LO3 & LO4 60% Weighting
		Competency Based Personal Development Plan	LO5 & LO6 40% Weighting

LEVEL 5 (Full Time)

<u>YEAR AND CREDITS</u>	<u>NAME OF MODULE</u>	<u>TYPE OF ASSESSMENT AND OVERVIEW OF CONTENTS</u>	<u>LINK TO LEARNING OUTCOMES AND PROGRAMME OUTCOMES.</u>
Year 2 20 Credits	Evidence Based Practice	Literature Review	LO 1 & 4 60% Weighting
		Journal Article Report	LO 2 & 3 40% Weighting
Year 2 20 Credits	Clinical Competence and Patient Assessment	Essay	LO 1, 2 & 3 40% Weighting
		Patient Assessment Tasks	LO 4, 5, 6 & 7 60% Weighting
Year 2 20 Credits	Leadership and Ethics in Practice	Case Study	LO1 50% Weighting
		Debate	LO2 50% Weighting
Year 2 20 Credits	Public Health and Health Promotion	Essay	LO1, LO2 & LO5 40% Weighting
		Video Presentation	LO3, LO4, LO5 & LO6 60% Weighting

		Occupational Performance Analysis	LO2 & LO4 30% Weighting

Appendix: 2 Ethical Considerations within Health and Social Care Research

Petroc and Northern Devon Healthcare NHS Trust will ensure that no primary research will be undertaken during the course of the programme unless there has been an approved submission for primary data collection via Petroc's/Northern Devon Healthcare NHS Trust Ethics Committee and subsequent approval given by the Ethics Committee.

13. Module Records

A single Module Record template is provided in this programme specification template. The Module Record will need to be replicated to cover the number of modules within this programme: highlight the entirety of the Module Record template → right-click → 'copy' → select an area at least one line below the previous Module Record → right-click and select 'paste – keep formatting'

IMPORTANT NOTE: amendments to section B of each Module Record should be undertaken annually. To capture this for reference and auditable purposes, the module records as a programme pack should be submitted annually to the University through Academic Partnerships.

NOTE RE EXISTING MODULES: when a new programme incorporates existing approved modules, the current module record should be duplicated/inserted without changes. Changes made to an approved module record during a programme approval (e.g. change to element weightings) will, in effect, create a new distinct module, to be identified by a new module code.

PS1. Professional Development (PD) modules within the award/s:

Please outline in the table below any modules from the award/s that will be used for Professional Development delivery. This allows for scrutiny of these modules by Approval Panels.

1. Module names*	2. Using the same Learning Outcomes?	3. Using the same mode of delivery?	4. Using the same mode of assessment?	5. Additional Information 6. (see below)
7. NORD 1126 Vocational Competence in Health and Social Care Practice	8. Yes	9. Yes	10. Yes	11.
12. NORD 1127 Understanding Practice	13. Yes	14. Yes	15. Yes	16.
17. NORD 1105 The Patient	18. Yes	19. Yes	20. Yes	21.

Journey and Care Process				
22. NORD 2108 Clinical Competence and Patient Assessment	23. Yes	24. Yes	25. Yes	26.
27. NORD 2114 Tissue Viability	28. Yes	29. Yes	30. Yes	31.
32. NORD 2115 33. The Management of the Plus Size Patient	34. Yes	35. Yes	36. Yes	37.

37.1.1.

37.1.2. Additional Information

This information allows Approval Panels to assess the use of these modules for use in other formats and contexts. Note this information is required only for PD delivery where there is assessment and PU credits will be awarded.

37.1.3. 60 Credit Certificate of Professional Development (CPD) Awards

If any of the modules listed in the table are to be grouped together to form a 60 Credit CPD Award, please list combinations planned below:

All modules contribute towards a 60 credit CPD award, no specific combination is necessary to achieve the 60 credit CPD award. A maximum of 60 credits in any combination, can be taken from these modules to achieve the 60 credit CPD award.

Module Records

SECTION A: DEFINITIVE MODULE RECORD

Module Code: NORD1128	MODULE TITLE: Foundations of Health & Social Care Practice
------------------------------	---

CREDITS: 20	FHEQ: Level 4	JACS CODE: L431
--------------------	----------------------	------------------------

PRE-REQUISITES: None	CO-REQUISITES: None	COMPENSATABLE: Yes
-----------------------------	----------------------------	---------------------------

SHORT MODULE DESCRIPTOR: (max 425 characters)

This module provides a comprehensive examination of contemporary health and social care provision within the United Kingdom. Factors which influence policy making and policy implementation will be exposed from a critical perspective which takes into consideration the global, national and regional dynamics which affect the way in which health and social care policy is constructed.

ELEMENTS OF ASSESSMENT Use HESA KIS definitions]

WRITTEN EXAMINATION		COURSEWORK		PRACTICAL	
E1 (Examination)	%	C1 (Coursework)	70%	P1 (Practical)	30%
E2 (Clinical Examination)	%	A1 (Generic Assessment)	%		
T1 (Test)	%				

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

The module aims to raise awareness surrounding the political, socio-economic, global and technological context of change in health and social care. Throughout the module, contextual analysis of the historical developments associated with health and social care policy and provision will also be evaluated in order to synthesise material and develop judgement and critical awareness of current health and social care paradigms.

ASSESSED LEARNING OUTCOMES: (additional guidance below)

At the end of the module the learner will be expected to be able to:

1. Evaluate the historical development of approaches and provision for health and social care in the United Kingdom.
2. Understand the political, socio-economic and global factors which influence health and social care policy making and policy implementation.
3. Evaluate the key contemporary global, national and regional policy themes that drive health and social care policy and provision
4. Discuss the contemporary political, socio-economic and technological context of change in health and social care
5. Analyse the possible consequences of potential future political, socio-economic and technological influences on health and social care provision within the United Kingdom.

DATE OF APPROVAL: 02/2016	FACULTY/OFFICE: Academic Partnerships
DATE OF IMPLEMENTATION: 09/2016	SCHOOL/PARTNER: Petroc
DATE(S) OF APPROVED CHANGE:	TERM/SEMESTER: Summer
Additional notes (for office use only): For delivering institution's HE Operations or Academic Partnerships use if required	

SECTION B: DETAILS OF TEACHING, LEARNING AND ASSESSMENT

Items in this section must be considered annually and amended as appropriate, in conjunction with the Module Review Process. Some parts of this page may be used in the KIS return and published on the extranet as a guide for prospective students. Further details for current students should be provided in module guidance notes.

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 103
-------------------------------	----------------------------------

MODULE LEADER: Shaun Kershaw	OTHER MODULE STAFF: Phil Boardman
-------------------------------------	--

SUMMARY of MODULE CONTENT

The structure of the NHS both historically and contemporary will be explored in light of politics, policy, socio-economic, technological and global factors especially in light of conceptual commentary on the notion of what health and social care means. As a central pillar of the module, health and social care policy and the dynamics of policy making in its own right will be explored with the intention of understanding the way in which health and social care provision has developed over time especially in terms of the dichotomy between social democratic welfare provision and neoliberal market philosophy. Furthermore, accountability, professionalism and the notion of compassionate and personalised health and social care provision will also be explored. The conceptual elements which underpin healthcare policy such as prevention, health promotion, new models of care and care pathways will also be explored in terms of their importance in affecting change within future policy formation.

SUMMARY OF TEACHING AND LEARNING [Use HESA KIS definitions]

Scheduled Activities	Hours	Comments/Additional Information
Lectures	30	Based on module aim and learning objectives
Seminars	10	Conceptual theories identified in the flipped classroom environment where groups introduce their theoretical knowledge and understanding
Discussions	10	Discussions based around health and social care policy formation and implementation
Guided Independent Study	150	To research, read, discuss, prepare, and produce material for both assignments and classroom discussions, seminars and workshops
Total	200	(NB: 1 credit = 10 hours or learning; 10 credits = 100 hours, etc)

Category	Element	Component Name	Component Weighting	Comments include links to learning objectives
Written exam	E1	N/A	0% Total	
	T1	N/A	0% Total	
Coursework	C1	Essay	Total = 100%	LO 3, 4 & 5– 2000 word essay will consider health and social care policy and provision from a critical viewpoint and discuss the advantages and disadvantages of a number of approaches to health and social care
Practical	P1	Presentation	Total = 100%	LO 1 & 2 – 10 minute presentation will enable students to show their understanding of what has influenced

				a chosen area of current health and social care provision from both a historical and contextually current political standpoint.

SECTION A: DEFINITIVE MODULE RECORD. *Proposed changes must be submitted via Faculty Quality Procedures for approval and issue of new module code.*

MODULE CODE: NORD1124		MODULE TITLE: Human Growth and Development	
CREDITS: 20		FHEQ Level: 4	
JACS CODE: C820			
PRE-REQUISITES: None		CO-REQUISITES: None	
COMPENSATABLE: Yes			

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

This module will provide an introduction to the physical and psychological theories related to human growth and development. At the heart of the module will be the study of the life stages and the impact which disease pathology as well as the socio-economic factors have on human growth and development.

ELEMENTS OF ASSESSMENT *Use HESA KIS definitions]*

WRITTEN EXAMINATION		COURSEWORK		PRACTICAL	
E1 (Examination)	%	C1 (Coursework)	100%	P1 (Practical)	%
E2 (Clinical Examination)	%	A1 (Generic Assessment)	%		
T1 (Test)	%				

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

The aims of the module are to enable understanding of the physical stages of human growth and development and the way in which biological and genetic factors affect such growth. To raise awareness of the psychological theories related to human growth and development. To identify socio-economic factors which influence human growth and development.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

1. Describe in detail the main stages of physical growth and development throughout the human life cycle
2. Demonstrate knowledge and understanding of the psychological theories which relate to human growth and development
3. Demonstrate knowledge of socio-economic factors which may affect human growth and development
4. Demonstrate knowledge and understanding of the biological and genetic factors which affect human growth, physiological development and the ageing of the human body
5. Identify the major structures and processes involved with maintaining biological homeostasis

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 103
-------------------------------	----------------------------------

MODULE LEADER: Shaun Kershaw	OTHER MODULE STAFF: Phil Boardman
-------------------------------------	--

SUMMARY of MODULE CONTENT

- Human physical growth, ageing and development
- Development throughout all life stages
- Psychological theories related to human development
- Social factors which affect individuals
- The impact of physical health, mental health and learning disability conditions on human growth and development.
- Biological and genetic factors which affect human growth and development
- Human anatomy and physiology with reference to health and ill health, societal impacts and behaviour and lifestyle choices
- The impact of life chances and significant life events on the development of individuals, their families and their carers
- Genetic and genomic influences on individual development
- Nature nurture debate

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 103
-------------------------------	----------------------------------

MODULE LEADER: Shaun Kershaw	OTHER MODULE STAFF: Phil Boardman
-------------------------------------	--

SUMMARY of MODULE CONTENT

Contemporary health and wellbeing paradigms will be explored in light of changing social and political dynamics especially in light of conceptual commentary on the notion of what health and wellbeing mean especially in terms of self-care, health promotion, health prevention and the notion of the co-production of care provision which sees the family increasingly integrated into the care process. As a central pillar of the module social policy and the drive towards personal responsibility, prevention of illness through health promotion and public health initiatives and emergent notions of sustainability, localism and devolution will be discussed. Global themes of health and wellbeing will also be considered especially within the context of the effects of health and social care provision in the future and the increased reliance on new digital technologies.

SUMMARY OF TEACHING AND LEARNING [Use HESA KIS definitions]

Scheduled Activities	Hours	Comments/Additional Information
Lectures	20	Based on module aim and learning objectives
Seminars	5	Conceptual theories identified in the flipped classroom environment where groups introduce their theoretical knowledge and understanding
Discussions	8	Discussions based around theoretical concepts and paradigms
Workshops	5	Assessment workshops
Tutorials	12	Supporting learners with their ideas surrounding both literature review and concept fair
Guided Independent Study	150	To research, read, discuss, prepare, and produce material for both assignments and classroom discussions, seminars and workshops

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

To enable learners to develop knowledge, understanding and self-awareness within the essential skill sets, personal attributes and work-based competences including the Care Certificate which underpin the assistant practitioner role and which together ensure safe and high quality healthcare practice.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)* At the end of the module the learner will be expected to be able to:

1. Demonstrate an understanding of a range of employability skills needed within the healthcare professions and the wider healthcare community, including those inherently linked with the role of Assistant Practitioner
2. Demonstrate the ability to critically appraise own working practices, personal attributes and developing skills sets in order to objectively assess personal and professional development over time
3. Evaluate the range of essential employability skills required within the role of the Assistant Practitioner and assess them in terms of how they impact on patient care and multidisciplinary team working
4. Evaluate, by utilising models of reflection, your own professional practice

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

To enable students to develop, build on and utilise knowledge in order to demonstrate a growing understanding of the multidimensional Assistant Practitioner role. Furthermore the module will also enable students to develop and then demonstrate a range of work based competencies linked with core national occupational standards in a safe, effective and professional manner.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

1. Understand the multidimensional role of an assistant practitioner
2. Evaluate the impact of working with a range of health professionals and environments
3. Identify and explain the impact of statutory and professional regulations, codes of practice and the principles of accountability in relation to individual practice
4. Demonstrate the ability to perform role specific work based competencies in a safe, effective and professional manner.
5. Discuss the possible dilemmas of practice when working within a multi-professional and multi-disciplinary team

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 103
-------------------------------	----------------------------------

MODULE LEADER: Shaun Kershaw	OTHER MODULE STAFF: Phil Boardman
-------------------------------------	--

SUMMARY of MODULE CONTENT

Assistant Practitioner and other senior support workers such as the nursing associate's roles, responsibilities and boundaries will be explored and emphasis will be placed on understanding statutory regulations, national service frameworks and national occupational standards. Core clinical and work based competencies will be worked towards within multidisciplinary settings to ensure students practice is safe and effective. Professional expectations, accountability and the notion of the duty of candour will be rigorously embedded within all aspects of the module content. Furthermore, the investigation of how the organisational approach to health and safety and those systems, policies and procedures that remove, reduce or control risk to the health and well-being of all will be explored in light of professional practice, codes of conduct and regulation. In addition the module will also explore the need to manage workloads and the role of prioritising in the delivery of care in accordance with planned care which embraces the principles of dignity, equality, diversity and humanity. The importance of the delivery of care will be critically discussed with reference made to legislation, policies, and local ways of working.

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

This module identifies and promotes the principles of high quality, compassionate patient-centred care practice in relation to the patient journey. The recognition, assessment, planning, implementation and evaluation of the patient journey will be considered in light of historical developments, policy implementation and most importantly the care process within a multi-disciplinary working environment.

ELEMENTS OF ASSESSMENT *Use HESA KIS definitions*

WRITTEN EXAMINATION		COURSEWORK		PRACTICAL	
E1 (Examination)	%	C1 (Coursework)	100%	P1 (Practical)	% or Pass/Fail (delete as appropriate)
E2 (Clinical Examination)	%	A1 (Generic Assessment)	%		
T1 (Test)	%				

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

This module aims to evaluate the integrated working practices and components integral to the care process and the patient journey experience. Discussion and practice will be centred on the way in which multidisciplinary teams of health and social care practitioners work in partnership to assess, plan, implement, and evaluate the care process in practice and contribute to the continued improvement of the patient journey.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

1. Understand the historical developments of the care process
2. Evaluate contemporary health and social care policy directed towards patient care
3. Discuss the importance of multidisciplinary working practices in terms of the delivery of a high quality, compassionate and patient centred care process
4. Justify the patient journey model in terms of improved patient outcomes
5. Reflect upon the skills, tools, core standards and techniques which health and social care practitioners utilise whilst providing care and facilitating a safe and effective patient journey.

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

The module will focus on developing the students understanding of different approaches to research in order to explore the concept of evidence based practice. Through analysis and synthesis of research based findings, via both qualitative and quantitative data collection models, the module will delve into the subjects of research methodology, the notion of reliability, validity, authenticity and research ethics.

ELEMENTS OF ASSESSMENT *Use HESA KIS definitions]*

WRITTEN EXAMINATION		COURSEWORK		PRACTICAL

E2 (Clinical Examination)	%	A1 (Generic Assessment)	%		
T1 (Test)	%				

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

Development of rigorous analysis and synthesis of practice, via the application of knowledge gained from a rigorous appraisal of evidence based practice, is essential for practitioners to understand in order to be able to make effective decisions which enhance patient care. This module aims to consolidate and extend the practitioners ability to critically appraise a range of healthcare related research literature and will ensure that practitioners understand the importance of utilising peer-review and authentic research findings for the continual evaluation and development of healthcare practice.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

- Demonstrate an understanding of the different research approaches to health and social care
- Locate authentic, peer reviewed and valid research literature via a range of data repositories
- Evaluate studies by accurately demonstrating knowledge of research methodologies, methods of data collection, analysis of findings and modes of presentation
- Discuss professional and ethical considerations in evidence based healthcare

DATE OF APPROVAL:	02/2016	FACULTY/OFFICE:	Academic Partnerships
DATE OF IMPLEMENTATION:	09/2017	SCHOOL/PARTNER:	Petroc
DATE(S) OF APPROVED CHANGE:	XX/XX/XXXX	TERM/SEMESTER:	Autumn

Additional notes (for office use only): For delivering institution's HE Operations or Academic Partnerships use if required

SECTION B: DETAILS OF TEACHING, LEARNING AND ASSESSMENT

Items in this section must be considered annually and amended as appropriate, in conjunction with the Module Review Process. Some parts of this page may be used in the KIS return and published on the extranet as a guide for prospective students. Further details for current students should be provided in module guidance notes.

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 103
------------------------	---------------------------

MODULE LEADER: Shaun Kershaw	OTHER MODULE STAFF:
------------------------------	---------------------

SUMMARY of MODULE CONTENT

Research methodologies will be explored in terms of governance and ethical frameworks as well as to the range of approaches within evidence based practice including quantitative, qualitative, post-qualitative and both critical and action research designs. Methods of data collection will be considered and also evaluated in terms of their validity, authenticity, reliability and depth of academic rigour. The analysis and presentation of findings will be explored along with an introduction to statistics and quality assurance frameworks as well as auditing processes. The reading, analysis, evaluation and synthesis of a range of research literature will underpin the content of the module to ensure that students develop their ability to appraise and critique data effectively. Healthcare research literature will also be assessed in terms of the ethical authenticity of the data collection methods employed and the mode in which the research narrative is represented especially in light of the advice provided by regulatory bodies such as NICE and the input of user involvement and peer review processes. Furthermore, there will be consideration given to the application and promotion of evidence based professional practice which places the individual and/or family/carer at the centre of care and exemplifies unconditional positive regard. In addition the module will identify how research, innovation and audit improve the quality of patient safety and care especially in relation to the challenges of the future.

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

This module will enable students to understand the many factors associated with how illness and morbidity impact on the physiology and health of the human body. Understanding and gaining competency in how to observe, monitor, assess and record vital signs and respond effectively to the deteriorating patient by working within a multidisciplinary team will be at the heart of the module.

ELEMENTS OF ASSESSMENT *Use HESA KIS definitions]*

WRITTEN EXAMINATION		COURSEWORK		PRACTICAL	
E1 (Examination)	%	C1 (Coursework)	40%	P1 (Practical)	60%
E2 (Clinical Examination)	%	A1 (Generic Assessment)	%		
T1 (Test)	%				

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

The aim of the module is to provide students with the understanding of how to effectively assess patients and deliver competent, safe and effective healthcare. By understanding how the body responds to illness and injury the student will become competent in observing, assessing, monitoring and recording vital signs. By recognising the early warning signs of the deteriorating patient, students will also understand how to respond effectively with appropriate and timely interventions.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

1. Understand how illness and injury impact on physiological functions
2. Evaluate the importance of safe and effective patient assessment methods
3. Understand the underlying principles for taking essential clinical measurements
4. Accurately assess, monitor and record vital physiological measurements by utilising track and trigger scoring systems and treatment escalation plans
5. Perform effective and accurate ABCDE assessments of the deteriorating patient & demonstrate competence in patient assessment and treatment techniques

DATE OF APPROVAL:	02/2016	FACULTY/OFFICE:	Academic Partnerships
DATE OF IMPLEMENTATION:	09/2017	SCHOOL/PARTNER:	Petroc

NATIONAL COST CENTRE: 103

MODULE LEADER: Shaun Kershaw

OTHER MODULE STAFF: Phil Boardman

SUMMARY of MODULE CONTENT

Detecting the early deterioration in a patient's physiological condition is an essential skill for assistant practitioners and the module will enable students to understand the different stages of patient assessment and the way in which the mechanism of injury and progression of illness can impact on the physiology of the human body. The taking, recording and acting upon clinical measurements will be a fundamental element of the module and students will appreciate the legal framework surrounding patient assessments such as obtaining consent, infection control and personal safety. Development and deployment of competency based immediate life support skills will also be demonstrated and the ability to work within and understand the clinical guidance and protocols associated with professional practice will also be embedded within the module content

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

This module will develop knowledge of the legal and ethical frameworks underpinning and governing healthcare practice. It will establish the importance of effective leadership and individual responsibility for practice and reinforce the concepts of accountability and liability and encourage the development of informed judgement and professional competence.

ELEMENTS OF ASSESSMENT *Use HESA KIS definitions]*

WRITTEN EXAMINATION		COURSEWORK		PRACTICAL	
E1 (Examination)	%	C1 (Coursework)	50%	P1 (Practical)	50%
E2 (Clinical Examination)	%	A1 (Generic Assessment)	%		
T1 (Test)	%				

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

To provide students with a comprehensive understanding of the legal and ethical framework underpinning and governing practice. Students will be required to illustrate their own individual responsibilities in practice and demonstrate knowledge of effective leadership styles suitable for healthcare environments. In addition, students will have to demonstrate a recognition of, and adherence to, accountability, duty of candour and liability procedures.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

1. Explain the legal and ethical framework which underpins healthcare practice
2. Demonstrate a thorough understanding of individual responsibilities in relation to legal and ethical procedures, policies and codes of practice
3. Demonstrate a critical understanding and evaluation of effective leadership styles suitable for the healthcare environment
4. Demonstrate a critical understanding of and adherence to the procedures relating to whistle-blowing, incident reporting and confidentiality in the workplace.

ACADEMIC YEAR: 2021/22

NATIONAL COST CENTRE: 103

MODULE LEADER: Shaun Kershaw

OTHER MODULE STAFF:

SUMMARY of MODULE CONTENT

Legal and ethical frameworks of care will be explained and discussed to take into consideration the legalities associated with patient vulnerability, the safeguarding of children, the protection of vulnerable adults and the approaches taken when developing, monitoring, evaluating and improving service delivery. Investigations into the way in which leadership styles and models impact on the performance, actions and motivations of healthcare practitioners such as Assistant Practitioners and Nursing Associates will be discussed. Specific attention will be orientated towards how incidents are reported, how practitioners can be empowered to act (especially within a leadership or supervisory role) when clinical governance has broken down and how the protection and security of personal data and a detailed appreciation of the notion of confidentiality can be reinforced. Furthermore, ethical considerations will be given to the relationship which the Assistant Practitioner and other support workers such as nursing associates form with the patient as an advocate/in therapeutic alliance with the patient and as partner in care with the families and carers. The importance of how teams work together effectively to ensure service improvement, focus on unwarranted variation and enable the concept of providing the right care in the right place at the right time to flourish will be explored especially in light of the role of technological innovations associated with improving health outcomes for patients, saving time and money and in the use of information to support better decision making processes.

------------------------	---------------------------

MODULE LEADER: Shaun Kershaw	OTHER MODULE STAFF:
------------------------------	---------------------

SUMMARY of MODULE CONTENT

The public health and health promotion challenges faced both regionally, nationally and globally are enormous, and the global health architecture is complex. This module will take into consideration the theories, principles, models and approaches which underpin both public health and health promotion strategies. Key debates and challenges will be evaluated with specific focus towards how healthcare practitioners integrate and embed health promotion, prevention and public health initiatives/approaches within their own practice. The symbiotic relationship between public health and health promotion will be explored in order to understand the potential threat of antimicrobial resistance, climate change, and control of communicable and non-communicable diseases as well as the push towards activating personal responsibility and empowerment in terms of health and wellbeing throughout the life course. The 2015 Sustainable Development Goals and concomitant factors surrounding politics, health policy, trade, and environmental influences will be assessed in terms of how they impact on health promotion and public health strategies especially in terms of enabling healthcare practitioners to encourage movement towards healthier and happier lifestyles and to enable patients to shape their own decisions about their treatment and care.

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

The module aims to provide learners with an understanding and appreciation of how to plan for and manage the effective care of patients who have long term conditions. Learners will be able to develop a range of competences required by an assistant practitioner for the effective management of long term conditions as well as understanding the vital importance which the application of evidence based practice has on the successful management of long term conditions.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

1. Demonstrate knowledge and critical understanding of a range of long term conditions
2. Demonstrate competences within a range of skills which are essential for the treatment and management of long term conditions
3. Understand and recognise the importance of implementing, via demonstration, the application of ethically sound evidence based health promotion advice to patients and their carers
4. Work collaboratively, as part of a multi-disciplinary and integrated team, to deliver high quality, person-centred care which is safe and effective and promotes patient independence
5. Demonstrate critical knowledge of safeguarding and confidentiality procedures whilst providing care for individuals with long term conditions

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 103
------------------------	---------------------------

MODULE LEADER: Shaun Kershaw	OTHER MODULE STAFF: Phil Boardman
------------------------------	-----------------------------------

SUMMARY of MODULE CONTENT

The NHS strategic framework for integrated care the House of Care model will be at the very heart of this module and will enable learners to appreciate the need for a joined-up and collaborative approach to the management, care and treatment of long-term conditions. Relevant guidance, codes of practice and current political and ethical perspectives will be taken into consideration when considering the way in which the delivery of care is undertaken. The management of care will look in depth at the different models of care and provide the learner with an appreciation of how to work effectively within multidisciplinary teams, how to promote and encourage independence, promote health literacy and how the NHS outcomes framework impacts on how services are commissioned. The aetiology of long term conditions will also be examined and the impact on the anatomy and physiology of the human body will be explored.

MODULE CODE:	NORD2112	MODULE TITLE:	Dementia and Cognitive Dysfunction
---------------------	----------	----------------------	------------------------------------

CREDITS: 20	FHEQ Level: 5	JACS CODE: C822
--------------------	----------------------	------------------------

PRE-REQUISITES: None	CO-REQUISITES: None	COMPENSATABLE: Yes
-----------------------------	----------------------------	---------------------------

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

This module will provide knowledge and understanding in the aetiology of dementia and cognitive dysfunction. The associated physiological and psychological impacts of dementia and cognitive dysfunction upon the health of the patient and their families will be investigated as well as providing the healthcare practitioner with an understanding and appreciation of the holistic caring approach to living well with dementia.

ELEMENTS OF ASSESSMENT *Use HESA KIS definitions]*

WRITTEN EXAMINATION		COURSEWORK		PRACTICAL	
E1 (Examination)	%	C1 (Coursework)	100%	P1 (Practical)	%
E2 (Clinical Examination)	%	A1 (Generic Assessment)	%		
T1 (Test)	%				

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

The module aims to provide learners with a holistic appreciation of the long term implications of dementia and cognitive dysfunction on the health and wellbeing of patients and their families. Key principles of care will be integrated into the living well with dementia model and investigations will be carried out into how healthcare practitioners can understand and promote the principles of dementia friendly communities. Additional appraisal and critical analysis of safeguarding guidance, dietary needs, environmental considerations, multidisciplinary teams and policy frameworks associated with dementia care will also be investigated.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

1. Understand the aetiology of dementia, delirium and cognitive dysfunction
2. Demonstrate an awareness of different models of care for individuals with dementia and cognitive dysfunction
3. Evaluate and synthesise information concerning the importance of promoting health and wellbeing for patients and their families who are affected by dementia and or cognitive dysfunction
4. Analyse dementia policy strategies and judge their effectiveness against current statistical and theoretical evidence
5. Judge with analytical awareness the impact of dementia and cognitive dysfunction on local communities, integrated services and policy formation.

DATE OF APPROVAL:	02/2016	FACULTY/OFFICE:	Academic Partnerships

SECTION B: DETAILS OF TEACHING, LEARNING AND ASSESSMENT

Items in this section must be considered annually and amended as appropriate, in conjunction with the Module Review Process. Some parts of this page may be used in the KIS return and published on the extranet as a guide for prospective students. Further details for current students should be provided in module guidance notes.

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 103
------------------------	---------------------------

MODULE LEADER: Shaun Kershaw	OTHER MODULE STAFF:
------------------------------	---------------------

SUMMARY of MODULE CONTENT

The aetiology of dementia, delirium and cognitive dysfunction will be explored with emphasis placed on the need to understand the lifestyle factors which may contribute to cognitive dysfunction. The notion of care closer to home will underpin the need to focus on dementia friendly community assets which can support healthcare practitioners in providing effective and safe care. Different models of care including therapeutic approaches such as validation, reality orientation, distraction and meaningful occupation will be critically evaluated in order to ensure learners have a holistic knowledge and understanding of how to promote health and wellbeing for patients with dementia and also their families. Government strategy and policy will also be explored in terms of future effectiveness, impact on service delivery and the way in which it helps to promote safe, effective and compassionate care, increased community understanding of dementia and the promotion of pioneering research within the field of cognitive dysfunction.

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

- To enable learners to study and reflect upon health and social care practice
- To enable students to carry out an independent study on a chosen area of professional practice based in the workplace
- Develop a range of additional work based competencies

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

1. Arrange and complete a work placement specific to health and social care practice
2. Critically self-evaluate learning and knowledge specific to a chosen work-based area of study
3. Using reflective skills, assess practice skills acquired and identify areas for continuing personal and professional development
4. Develop and gain additional healthcare competencies

MODULE CODE:	NORD2114	MODULE TITLE:	Tissue Viability
---------------------	----------	----------------------	------------------

CREDITS: 20	FHEQ Level: 5	JACS CODE: B100
--------------------	----------------------	------------------------

PRE-REQUISITES: None	CO-REQUISITES: None	COMPENSATABLE: No
-----------------------------	----------------------------	--------------------------

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

This module will provide the learner with knowledge and understanding surrounding the importance of maintaining skin integrity. It will also enable the learner to build competence in the management of patients with acute, chronic and complex wounds and provide them with an appreciation as well as an in depth knowledge of the prevention and management of pressure damage as well as the facilitation of wound healing.

ELEMENTS OF ASSESSMENT *Use HESA KIS definitions]*

WRITTEN EXAMINATION		COURSEWORK		PRACTICAL

E2 (Clinical Examination)	%	A1 (Generic Assessment)	%		
T1 (Test)	%				

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

The module aims to facilitate, via knowledge and understanding, the importance of skin integrity and tissue viability services. The module will provide learners with the competencies to manage and treat compromised tissue as well as the knowledge, understanding and skills needed to prevent tissue breakdown.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

1. Describe the physiological mechanisms in relation to relevant systems which underpin the maintenance of skin integrity
2. Demonstrate understanding of the importance of tissue viability services to the health and wellbeing of patients
3. Understand the aetiology of tissue breakdown and infection
4. Demonstrate competence in the management and treatment of compromised tissue including leg and pressure ulcers
5. Evaluate the importance of multidisciplinary and integrated service delivery for the management, treatment and prevention of tissue breakdown.

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 103
-------------------------------	----------------------------------

MODULE LEADER: Wendy Finch	OTHER MODULE STAFF:
-----------------------------------	----------------------------

SUMMARY of MODULE CONTENT

The module will expose the learner to the anatomy and physiology of the skin, wound aetiology, the maintenance of skin integrity and the possibilities of skin breakdown. Wound assessment, wound bed preparation, the decision making process and wound management will form an integral part of the teaching discussions and competency based activities. Interdisciplinary wound management and risk assessment tools will be explored, production selection and pressure reduction versus pressure relief debates will be assessed along with the political and social influences of wound care management. The ethical governance of wound management and general care of people with damaged tissue will also be analysed in depth.

PRE-REQUISITES: None	CO-REQUISITES: None	COMPENSATABLE: No
-----------------------------	----------------------------	--------------------------

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

This module will enable students to become knowledgeable and analytically aware of the many risks associated with the management of the plus size patient due to their weight, size, shape and impaired health and/or mobility.

ELEMENTS OF ASSESSMENT *Use HESA KIS definitions]*

WRITTEN EXAMINATION		COURSEWORK		PRACTICAL	
E1 (Examination)	%	C1 (Coursework)	100%	P1 (Practical)	%
E2 (Clinical Examination)	%	A1 (Generic Assessment)	%		
T1 (Test)	%				

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

The module aims to develop knowledge and understanding within the many factors which contribute to weight gain, obesity and morbid/super obesity. The contributory factors will be assessed and evaluated in terms of the long term health effects such conditions have on the human body. The effective and safe management of the plus size patient within different health and social care environments will be explored. In addition the way in which healthcare practitioners can impact positively via knowledge of health promotion on the way in which such conditions can be effectively managed by the patient will be critically evaluated.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

1. Understand the aetiology of obesity, morbid obesity and super obesity and how obesity-related health conditions can impact on physiological function, patient wellbeing and life expectancy
2. Understand how to effectively plan for, assess, monitor and record information relating to the care of the plus size patient and their associated medical complications
3. Evaluate how the management of the plus size patient can impact on health and social care practice
4. Demonstrate knowledge and competence in safe and effective patient handling techniques as well as within the selection and use of specialised patient handling equipment for the plus size patient
5. Evaluate how the healthcare practitioner can effectively embed lifestyle and behavioural modification techniques in to their own practice whilst caring for the plus size patient

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 103
------------------------	---------------------------

MODULE LEADER: Shaun Kershaw	OTHER MODULE STAFF:
------------------------------	---------------------

SUMMARY of MODULE CONTENT

The module will expose the learner to the aetiology of obesity, morbid obesity and super obesity and the many factors which are linked to the impacts that such conditions have not only on the long term physical and mental wellbeing of the patient but also on the practice which is provided by healthcare practitioners. The planning, assessment, monitoring and recording of plus size patient care and the information linked to this will be investigated along with a detailed look at the management of the plus sized patient in terms of legislation, health promotion, patient handling techniques, mental health and multidisciplinary and integrated health and social care teams.

--------------------	----------------------	------------------------

PRE-REQUISITES: None	CO-REQUISITES: None	COMPENSATABLE: Yes
-----------------------------	----------------------------	---------------------------

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

This module will explore the diverse and far reaching impact that multidisciplinary teams have on patient care and service delivery. With government policy aimed at addressing fragmentation in patient services and attempting to coordinate far reaching change towards an integrated model of care, the Assistant Practitioner will need to understand the multifaceted nature of the multidisciplinary working environment.

ELEMENTS OF ASSESSMENT *Use HESA KIS definitions]*

WRITTEN EXAMINATION		COURSEWORK		PRACTICAL	
E1 (Examination)	%	C1 (Coursework)	40%	P1 (Practical)	60%
E2 (Clinical Examination)	%	A1 (Generic Assessment)	%		
T1 (Test)	%				

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Assistant Practitioner

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

The module will aim to facilitate a deeper understanding of the role and impact of the multidisciplinary teams on patient care, policy direction and policy implementation. Analysis of the wide range of allied health professions will be central to the module aims and will enable learners to evaluate the way in which service delivery is provided by multidisciplinary health and social care teams in the 21st Century.

ASSESSED LEARNING OUTCOMES: *(additional guidance below)*

At the end of the module the learner will be expected to be able to:

1. Understand the way in which the role of the assistant practitioner links with a range of health professions
2. Demonstrate a sound understanding of the potential benefits of a range of therapies on patient care
3. Analyse the impact and value of multidisciplinary working on patient care
4. Evaluate and judge the importance of Allied Health Professionals within the health and social care environment
5. Demonstrate a critical understanding of how multidisciplinary teams will be utilised within an integrated, care closer to home model of patient care

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 103
-------------------------------	----------------------------------

MODULE LEADER: Shaun Kershaw	OTHER MODULE STAFF:
-------------------------------------	----------------------------

SUMMARY of MODULE CONTENT

The module will consider the roles and responsibilities of a wide range of allied health professionals such as radiographers, speech and language therapists, occupational therapists, physiotherapists, dieticians, operating department practitioners, podiatrists, audiologists etc. The module content will also include the impact of the multidisciplinary team on the delivery of high quality healthcare within an integrated health and social care service provision. The NHS 5 Year Forward View policy and related policy documents will be explored in terms of how AHP are integrated into practice. Investigations in to how multidisciplinary teams help treat and manage long term conditions and multiple morbidities. Codes of conduct and professional affiliation will be critically considered along with the way in which multidisciplinary and multiagency teams work together.

ASSESSED LEARNING OUTCOMES: (additional guidance below; please refer to the Programme Specification for relevant award/ programme Learning Outcomes.)

At the end of the module the learner will be expected to be able to:

Assessed Module Learning Outcomes	Award/ Programme Learning Outcomes contributed to
1) Demonstrate understanding of the philosophical assumptions of occupational science and occupational therapy practice 2) Demonstrate an awareness of the core skills underpinning occupational therapy practice 3) Develop an understanding of the occupational therapy process and its application in practice 4) Evaluate and synthesise the evidence underpinning occupational therapy practice 5) To develop and contribute to professional portfolios	N/A

DATE OF APPROVAL: XX/XX/XXXX	FACULTY/OFFICE: Health and Human Sciences
DATE OF IMPLEMENTATION: 10/09/2018	SCHOOL/PARTNER: Health Professions
DATE(S) OF APPROVED CHANGE: XX/XX/XXXX	SEMESTER: Semester 1

Additional notes (for office use only):

Students are required to achieve all elements of the module assessment to pass the module overall.

SECTION B: DETAILS OF TEACHING, LEARNING AND ASSESSMENT

Items in this section must be considered annually and amended as appropriate, in conjunction with the Module Review Process. Some parts of this page may be used in the KIS return and published on the extranet as a guide for prospective students. Further details for current students should be provided in module guidance notes.

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE:
MODULE LEADER: Marnie Smith	OTHER MODULE STAFF: Sam Whiting

Summary of Module Content

- Introduction to philosophical assumptions underpinning occupational science and occupational therapy including the centrality of occupational engagement for health, wellbeing and client centred practice.
- Introduction to the range of core skills used by occupational therapists in the areas of assessment, intervention and outcome measurement.
- Introduction to the principles and process of evidence based practice for occupational therapy.
- Introduction to the importance of the development of professional portfolios.

SECTION A: DEFINITIVE MODULE RECORD. *Proposed changes must be submitted via Faculty Quality Procedures for approval and issue of new module code.*

MODULE CODE: OCT 527	MODULE TITLE: Occupational Studies: Foundations for Occupational Therapy Practice 2
--------------------------------	--

CREDITS: 20	FHEQ LEVEL: 5	JACS CODE:
--------------------	----------------------	-------------------

PRE-REQUISITES: None	CO-REQUISITES: None	COMPENSATABLE: N
-----------------------------	----------------------------	-------------------------

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

Students will identify the intrinsic components of occupational engagement through exploring and evaluating the range of components required to engage in occupational performance. Students will study the interaction between person, occupation and context to explore and apply how occupational therapy theory and process promotes occupational engagement.

ELEMENTS OF ASSESSMENT [Use HESA KIS definitions] – see [Definitions of Elements and Components of Assessment](#)

E1 (Examination)	xx%	C1 Essay (Coursework)	70%	P1 (Practical)	xx% or Pass/Fail
E2 (Clinical Examination)	xx% or Pass/Fail	C2 Occupational Performance analysis	30%		
T1 (Test)	xx%	A1 (Generic assessment)	Pass/Fail		

SUBJECT ASSESSMENT PANEL to which module should be linked: OT/OT

Professional body minimum pass mark requirement: 40%

MODULE AIMS:

- To enable an understanding of occupational performance components.
- To evaluate the interaction between person, occupation and context.
- To explore the relationship between occupational interruption and the components of occupation.

- To examine and apply occupational therapy theory and process in relation to promotion of occupational engagement.

ASSESSED LEARNING OUTCOMES: (additional guidance below; please refer to the Programme Specification for relevant award/ programme Learning Outcomes.)

At the end of the module the learner will be expected to be able to:

Assessed Module Learning Outcomes	Award/ Programme Learning Outcomes contributed to
<p>1.To identify and apply occupational performance components including physical, cognitive, emotional, and spiritual aspects.</p> <p>2.To evaluate how these dynamically related components of occupational performance impact on the interaction between person, occupation and context in relation to health and wellbeing.</p> <p>3.To demonstrate an understanding of the relationship between occupational interruption and the components of occupation.</p> <p>4. To identify and integrate occupational therapy theory and process considering how to promotes occupational engagement.</p>	N/A

UNIVERSITY OF PLYMOUTH MODULE RECORD

SECTION A: DEFINITIVE MODULE RECORD. *Proposed changes must be submitted via Faculty/AP Quality Procedures for approval and issue of new module code.*

MODULE CODE: PHY507	MODULE TITLE: Physiotherapy Foundations 1	
CREDITS: 20	FHEQ LEVEL: 5	HECOS CODE:
PRE-REQUISITES:	CO-REQUISITES:	COMPENSATABLE: N

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

This module introduces students to understanding and assessing the biomechanics of human movement and builds on students' anatomy and physiology. Using a mixture of learning and teaching methods, movement science and functional anatomy are explored, including kinematics, kinetics, posture, proprioception, neuromuscular control and gait in relation to common functional and postural deficits.

ELEMENTS OF ASSESSMENT - [Use HESA KIS definitions] – see [Definitions of Elements and Components of Assessment](#)

E1 (Examination)		C1 (Coursework)		P1 (Practical)	
E2 (Clinical Examination)	100%	A1 (Generic assessment)			
T1 (Test)					

SUBJECT ASSESSMENT PANEL to which module should be linked: Physiotherapy

Professional body minimum pass mark requirement: 40% in all percentage weighted elements and components, all elements/components must be passed.

MODULE AIMS:

To enable the students to develop knowledge and understanding of the applied anatomy and biomechanics of human movement and gait. This will be in the context of common functional and postural deficits.

ASSESSED LEARNING OUTCOMES: (additional guidance below; please refer to the Programme Specification for relevant award/ programme Learning Outcomes.

At the end of the module the learner will be expected to be able to:

Assessed Module Learning Outcomes	Award/ Programme Learning Outcomes contributed to
<ol style="list-style-type: none"> 1. Apply knowledge of the structure and function of the neuro-musculoskeletal system in human movement. 2. Discuss and demonstrate knowledge and understanding of the applied anatomy related to human movement, function and gait. 3. Discuss and demonstrate knowledge and understanding of the biomechanics of human movement, function and gait. 4. Demonstrate examination skills applicable to assessment of human movement, function and gait. 	Knowledge and Understanding LO1 Cognitive and intellectual skills LO1 Key and transferrable skills LO1, 2 Practical skills LO1

UNIVERSITY OF PLYMOUTH MODULE RECORD

SECTION A: DEFINITIVE MODULE RECORD. *Proposed changes must be submitted via Faculty/AP Quality Procedures for approval and issue of new module code.*

MODULE CODE: PHY508	MODULE TITLE: Physiotherapy Foundations 2	
CREDITS: 20	FHEQ LEVEL: 5	HECOS CODE:
PRE-REQUISITES: N	CO-REQUISITES: N	COMPENSATABLE: N

SHORT MODULE DESCRIPTOR: *(max 425 characters)*

This module introduces the students to physiotherapy in the areas of cardiorespiratory, musculoskeletal and neurological practice. Simulated case scenarios will facilitate the students' learning related to specific patient problems encountered in these areas of physiotherapy practice. The evidence base supporting practice will be explored and critically appraised.

ELEMENTS OF ASSESSMENT - *[Use HESA KIS definitions]* – see [Definitions of Elements and Components of Assessment](#)

E1 (Examination)		C1 (Coursework)	100%	P1 (Practical)	
E2 (Clinical Examination)		A1 (Generic assessment)			
T1 (Test)					

SUBJECT ASSESSMENT PANEL to which module should be linked: Physiotherapy

Professional body minimum pass mark requirement: 40% in all percentage weighted elements and components, all elements/components must be passed.

MODULE AIMS:

To enable the students to develop knowledge and understanding of the cardiorespiratory, nervous and musculoskeletal systems and of pathological processes affecting these. To develop an understanding of the effects of cardiorespiratory, neurological and musculoskeletal impairments; and to discuss the impact of these on activity and participation restrictions. To enable students to undertake basic assessment and introduce basic management strategies for cardiorespiratory, neurological and musculoskeletal conditions including exercise prescription and the design of tailored exercise programmes. Students will be able to identify, and apply evidence based practice follow a patient based approach. Students will be able to support and justify their clinical management with the selection and appraisal of appropriate evidence.

ASSESSED LEARNING OUTCOMES: (additional guidance below; please refer to the Programme Specification for relevant award/ programme Learning Outcomes.

At the end of the module the learner will be expected to be able to:

Assessed Module Learning Outcomes	Award/ Programme Learning Outcomes contributed to
<ol style="list-style-type: none"> 1. Justify with use of supporting evidence the rationale for physiotherapy approaches in the management of cardiorespiratory, neurological and musculoskeletal problems 2. Describe the consequences of cardiorespiratory, nervous and musculoskeletal system impairments and discuss the impact of these on activity and participation restrictions. 3. Discuss appropriate physiotherapy skills, utilising clinical reasoning, in the management of cardiorespiratory, neurological and musculoskeletal problems. 4. Evaluate and apply the evidence base in the formation of physiotherapy management plans 	<p>Knowledge and understanding LO1,2</p> <p>Cognitive and intellectual skills LO1, 2</p> <p>Key and transferable skills LO 1, 2, 3</p> <p>Practical skills LO 1, 2</p>

- National Cost Centres. A list of current (2012/13 onwards) Cost Centres is available at: <https://www.hesa.ac.uk/content/view/102/143/1/2/>

14. Staffing and Resources

37.3. PD4.1 Programme Level Strategy for Staffing and Resourcing

While staff appointments remain the remit of the partner, the University must assure itself of the quality and quantity of staff and resources for Plymouth University awards. In order to assist in underpinning this assurance, an explanation of strategy for staffing and resourcing follows:

- How will an appropriate balance of teaching staff be guaranteed across the years of delivery?
- All current staff employed in either full time or part time posts who are teaching on the existing BA (Hons) Professional Development (Health and Social Care) programme would contribute to the teaching of this programme and therefore have both academic and professional currency. In addition, Northern Devon Healthcare NHS Trust teaching and clinical staff will also teach, mentor and provide clinical support for students on the Health and Social Care Practice (Assistant Practitioner) programme. Apart from the occurrence of unforeseen circumstances the team would continue to teach across the programme thus making the academic and professional currency of the health and social care Practice (Assistant Practitioner) programme of study stable and viable over the long term.
- How will staff absence and turnover be accommodated?
- The diet of study outlined in the programme structure and detailed within the modules requires a breadth of knowledge, skills and attribute sets within the body of teaching staff along with resources and facilities. Post approval, it would be normal for a programme to experience staff changes and resource changes over time. It is therefore important to clarify the skills set required for delivering the programme and modules are appropriately maintained. This is not only of benefit for programme leaders and module leaders but also for institutions when considering staff recruitment and/or resourcing.
- How does the programme draw on staff who teach on other programmes?
- The FdSc Health and Social Care and BA (Hons) Professional Development (Health and Social Care) programmes of study already exist at Petroc and some of the modules on the proposed Health and Social Care Practice (Assistant Practitioner) would be staffed by existing programme staff.
- What proportion of the teaching team is made up of full and part-time staff?
- Three full time members of staff and seven part-time members of staff
- Where staff appointments are required post-approval, what is the outline of the profile of staff that will be appointed and to what timescales? N/A – All staff available in-house currently or as part of the NDHT clinical teaching team.

PD4.2 Module Level Staffing and Resourcing Requirements - aligned with current staff ⁵
