Welcome and Introduction

Welcome to the Foundation Degree in Computing delivered at University Centre, North Devon Campus, at Petroc.

This course covers the underpinning theory of computing but also provides practical skills with immediate relevance in the workplace enabling graduates to gain challenging and engaging employment. It has been a successful stepping-stone for motivated mature students and gives all students the opportunity to progress to a final year of a BSc at Plymouth. The focus is on problem solving, skills for lifelong learning and integrating theory with practical experience.

Assessments reflect the range of communication skills required in today's workplace and include presentations and vivas, practical work, blogs, implementing applications, documentation, user reviews and written submissions.

Background to the Development of your Foundation Degree

The South West Regional Development Agency's Annual Review 2005-6 states; 'We have invested in extending broadband availability – a vital piece in the communications jigsaw – enabling rural and far-flung parts of the region to compete effectively'. Dane Stanley of the North Devon Enterprise Agency says that over 90% of the new businesses he supports are IT based.

The design of the programme was informed by the overarching guidelines of the Academic Infrastructure, provided by the Quality Assurance Agency, and in particular the Foundation Degree Qualification Benchmark. Continued liaison with the University of Plymouth, adherence to their regulations and the benefits of their staff development programme ensure that this programme is rigorous and up to date. The range of modules has been designed to equip you with the skills and knowledge base required to work in your chosen specialism or other graduate opportunities. It is also a platform from which you can undertake additional vocational and academic qualifications.

The programme was been redesigned in 2020-21 and updated in line with industry standards and South West Institute of Technology developments which brings investment to Petroc to provide a high-quality learning environment which opened in September 2021.

This programme has been designed to equip you with the skills and knowledge base required to work in your chosen specialism or other graduate opportunities. It is also a platform from which you can undertake additional vocational and academic qualifications.

This Programme Quality handbook contains important information including:

- The approved programme specification
- Module records
- Note: The information in this handbook should be read in conjunction with the current edition of:
 - Your University Student Institution Handbook which contains student support based information on issues such as finance and studying at HE available at: https://my.petroc.ac.uk/moodle/moodle_3/course/view.php?id=3059
 - Your Module Guide available at: https://my.petroc.ac.uk/moodle/moodle_3/course/view.php?id=699
 - Your University of Plymouth Student Handbook available at: <https://www.plymouth.ac.uk/your-university/governance/student-handbook>

Programme Specification

1. Foundation Degree in Computing

Final award title: FdSc Computing

Level 4 Intermediate award title(s): None

UCAS Code: G401

HECOS Code: I320

2. Awarding Institution: University of Plymouth

Teaching institution(s): Petroc

3. Accrediting body(ies): None

Summary of specific conditions/regulations: N/A

Date of re-accreditation: N/A

4. Distinctive Features of the Programme and the Student Experience

This Foundation Degree in Computing

- is aligned with the professional demands of technical computing roles to enable students to gain challenging and engaging employment in this field and contribute to the development of regional industries and thus the region's economy.
- has been a successful stepping stone for motivated mature students and school or college leavers alike, who aspire to enter or progress through a career in digital industries. With this in mind, successful completion of this programme enables progression to the final year of bachelor degree at the University of Plymouth¹.
- covers a broad range of professional practice, a clear understanding of fundamental principles, a variety of programming languages, knowledge of data management, security, networking and project planning. This meets regional requirements and also provides students with opportunities to specialise or integrate their knowledge in a professional environment
- will develop critical and transformative students with the ethos and skills for career-long professional development in a rapidly developing and far reaching area of expertise
- focuses on problem-solving, lifelong learning and integrating theory with practical experience

¹ Dependent on adherence to the University's regulations and the availability of these programmes at the time of application to this Foundation Degree.

5. Relevant QAA Subject Benchmark Group(s)

- As a Foundation Degree, this programme is informed by the bachelor level QAA Subject Benchmark for Computing, 2019
- QAA Framework for Higher Education Qualifications, 2014
- QAA Foundation Degree Characteristics Statements, 2015

6. Programme Structure

Year 1: FdSc Computing full-time			
Module Code	Module Title	Credits	AY/AU/SP
PETR1120	Academic and Professional Skills	20	AU
PETR1121	Fundamental Concepts in Computing	20	AU
PETR1122	Web Design & Development	20	AU
PETR1123	Software Development	20	SP
PETR1124	Operating Systems and Networking	20	SP
PETR1125	Security Fundamentals	20	SP

Year 2: FdSc Computing full-time			
Module Code	Module Title	Credits	AY/AU/SP
PETR2163	Group Project	20	SP
PETR2164	Mobile Applications and user experience	20	AU
PETR2165	Enterprise Networks & Cloud Services	20	SP
PETR2166	Object Oriented Programming	20	AU
PETR2167	Database Applications Development	20	AU
PETR2168	Emerging Technologies	20	SP

Year 1: FdSc Computing part-time			
Module Code	Module Title	Credits	AY/AU/SP
PETR1120	Academic and Professional Skills	20	AU
PETR1121	Fundamental Concepts in Computing	20	AU
PETR1123	Software Development	20	SP
PETR1125	Security Fundamentals	20	SP

Year 2: FdSc Computing part-time			
Module Code	Module Title	Credits	AY/AU/SP
PETR1122	Web Design & Development	20	AU
PETR2164	Mobile Applications and user experience	20	AU
PETR1124	Operating Systems and Networking	20	SP
PETR2167	Database Applications Development	20	AU

Year 3: FdSc Computing part-time			
Module Code	Module Title	Credits	AY/AU/SP
PETR2163	Group Project	20	SP
PETR2165	Enterprise Networks & Cloud Services	20	SP
PETR2166	Object Oriented Programming	20	AU
PETR2168	Emerging Technologies	20	SP

7. Programme Aims

This programme aims to provide opportunities for students to:

1. develop fundamental understanding of computing concepts and how these relate to rapidly evolving technological developments
2. gain appreciation and knowledge of the ethical, social and professional responsibilities of working in the computing industry
3. develop understanding of relevant technologies, and the analysis, synthesis and evaluation skills used to solve computing problems
4. apply skills and knowledge to plan, implement and test solutions
5. develop skills in lifelong learning supported by flexibility, resilience and creativity
6. develop a range of academic skills to support undergraduate development

8. Programme Intended Learning Outcomes

8.1. Knowledge and understanding

On successful completion graduates should have developed critical knowledge and understanding of:

1. fundamental computing concepts that influence system performance
2. essential facts, concepts, principles and theories within software, networking, security and data management
3. scientific approaches and methods for pragmatic problem-solving and academic investigation
4. an understanding of legal, regulatory, professional and ethical responsibilities relevant to IT professionals

8.2. Cognitive and intellectual

On successful completion graduates should have developed cognitive and intellectual skills to:

1. gather and apply appropriate theory and practices to specify, design, implement and finally deliver a solution to a computing problem
2. test and evaluate systems and reflect on system outcomes in a professional manner
3. apply appropriate methods to investigate problems that may be solved using the application of computing knowledge and skills
4. evaluate the impact and mitigating factors for a range of security issues

8.3. Key and transferable skills

On successful completion graduates should have developed the ability to:

1. communicate reasoned arguments to a range of audiences in various modes allowing them to discuss and defend a decision
2. work in a team and recognise their own and others' contribution to achieve the desired outcome
3. work independently, plan effectively, meet deadlines and recognise the importance of high quality solutions
4. recognise factors in environmental and societal contexts relating to continuing technological developments

8.4. Employment related skills

On successful completion graduates should have developed:

1. high professional standards and knowledge of recognised industry standards and processes
2. the ability to synthesise considerations of business, customer and user needs alongside the wider computing context
3. skills to focus and reflect upon relevant work-based learning so as to improve their continuing professional development within the working environment
4. knowledge of emerging technologies as they apply to the workplace

8.5. Practical skills

On successful completion graduates should have developed:

1. a range of programming skills to contribute effectively to the production of industry standard applications
2. skills to contribute effectively to the design, implementation and management of an organisational IT system
3. skills to contribute to the project management of a digital-based project
4. skills to work collaboratively with colleagues using a range of cloud-based applications

9. Admissions Criteria, including APCL, APEL and DAS arrangements.

All applicants must have GCSE (or equivalent) Maths and English at Grade C/Grade 4 or above. Mature students are welcome to apply. All applicants are interviewed before an offer is made.

Entry Requirements for FdSc Computing	
A-level/AS-level	Normal minimum entry requirements are 56 on new UCAS Tariff at A-level
BTEC National Diploma/QCF Extended Diploma	Equivalent of 56 UCAS points in a Computing Subject
Access to Higher Education at level 3	Pass an Access to HE Diploma in Science with an equivalent of 56 UCAS points
Welsh Baccalaureate	Normal minimum entry requirements are an equivalent of 56 on new UCAS Tariff to include Maths
Scottish Qualifications Authority	Normal minimum entry requirements are an equivalent of 56 on new UCAS Tariff to include Maths
Irish Leaving Certificate	Normal minimum entry requirements are an equivalent of 56 on new UCAS Tariff to include Maths
International Baccalaureate	Normal minimum entry requirements are an equivalent of 56 on new UCAS Tariff to include Maths
Progression from Extended Science	Normal minimum entry requirements are an equivalent of 56 on new UCAS Tariff to include Maths
Non-Standard Qualifications with experience	All non-standard applicants are interviewed by the tutor and screened centrally to ensure impartial oversight. APEL and APCL may take place at this time or by prior arrangement
Capability and disability	Both the context of, and therefore likelihood for future employment, and active study on this programme requires engagement with various technologies across engineering environments, including workshops, laboratories, and a wide variety of engineering industries. If the College is unable facilitate the adjustments or the applicant would be unable to comply an offer may be withdrawn.

8. Progression criteria for Final and Intermediate Awards

BSc (Hons) Computing and Software Development Level 6 at University of Plymouth
BSc (Hons) Integrated Technologies Engineering [Top up] at Petroc

9. Non Standard Regulations

None

10. Transitional Arrangements

None

DATE(S) OF APPROVED CHANGE: XX/XX/XXXX	SEMESTER: 1
Notes:	

Additional Guidance for Learning Outcomes:

To ensure that the module is pitched at the right level check your intended learning outcomes against the following nationally agreed standards

- Framework for Higher Education Qualifications <http://www.qaa.ac.uk/docs/qaa/quality-code/qualifications-frameworks.pdf>
- Subject benchmark statements <https://www.qaa.ac.uk/quality-code/subject-benchmark-statements>
- Professional, regulatory and statutory (PSRB) accreditation requirements (where necessary e.g.health and social care, medicine, engineering, psychology, architecture, teaching, law)
- QAA Quality Code <https://www.qaa.ac.uk/quality-code>

SECTION B: DETAILS OF TEACHING, LEARNING AND ASSESSMENT

Items in this section must be considered annually and amended as appropriate, in conjunction with the Module Review Process. Some parts of this page may be used in the KIS return and published on the extranet as a guide for prospective students. Further details for current students should be provided in module guidance notes.

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 121
MODULE LEADER: Jane Sansbury	OTHER MODULE STAFF:
<p>Summary of Module Content</p> <ul style="list-style-type: none"> • Academic skills • Self-evaluation and reflection • Time-management • Research skills • Academic referencing • Academic writing • Attitudes to learning Professional skills • Group work • Project management in workplace - Agile • Version control - for example using ng GitHub • Legal, regulatory, professional and ethical responsibilities e.g. GDPR, Computer Misuse Act, British Computer Society Code of Conduct • Challenge of continuing technological developments • Approaches to problem solving Communication skills • Practical skills - Word e.g. using styles, table of contents, Presentation Blogging software • Presentation skills • Different writing styles 	

SUMMARY OF TEACHING AND LEARNING [Use HESA KIS definitions]		
Scheduled Activities	Hours	Comments/Additional Information (briefly explain activities, including formative assessment opportunities)
Lectures	15	Delivering skills and content
Supervised Workshops	35	Individual and group tasks to develop academic and practical skills Support with developing portfolio of skills
Self-directed Study	150	
Total	200	(NB: 1 credit = 10 hours of learning; 10 credits = 100 hours, etc.)

SUMMATIVE ASSESSMENT

Element Category	Component Name	Component Weighting
Coursework	1. Portfolio of evidence including reflection on problem solving, presentation skills and academic writing	70%
	2. Online of legal, regulatory, professional and ethical frameworks developed in a group using version control with evidence of revision by all parties	30%
		100%

REFERRAL ASSESSMENT

Element Category	Component Name	Component Weighting
Coursework	1. Portfolio of evidence including reflection on problem solving, group work, presentation skills and academic writing	70%
	2. Online overview of legal, regulatory, professional and ethical frameworks developed as an individual, using version control with evidence of revision	30%
		100%

**UNIVERSITY OF PLYMOUTH MODULE
RECORD**

SECTION A: DEFINITIVE MODULE RECORD. Proposed changes must be submitted via Faculty/AP Quality Procedures for approval and issue of new module code.

MODULE CODE: PETR1124		MODULE TITLE: Operating Systems and Networking			
CREDITS: 20		FHEQ LEVEL: 4		HECOS CODE: I320	
PRE-REQUISITES: N/A		CO-REQUISITES: N/A		COMPENSATABLE: Y	
SHORT MODULE DESCRIPTOR: <i>(max 425 characters)</i> Operating systems and networks provide the infrastructure on which computing services are built. This module covers the theoretical structures which underpin operating systems and network services and also gives practical experience of implementing the core features of a network.					
ELEMENTS OF ASSESSMENT [Use HESA KIS definitions] – see <u>Definitions of Elements and Components of Assessment</u>					
E1 (Examination)	0%	C1 (Coursework)	50%	P1 (Practical)	0%
E2 (Clinical Examination)	0%	A1 (Generic assessment)	0%		
T1 (Test)	50%				
SUBJECT ASSESSMENT PANEL to which module should be linked: Computing					
Professional body minimum pass mark requirement: N/A					
MODULE AIMS: To develop a theoretical and practical knowledge of operating system and networking structures and the interaction between them. To understand the common issues with traditional and contemporary operating system and networking models. To develop theoretical and practical skills in configuring a simulated networking environment which will provide underpinning knowledge on wider networking technologies covered in future modules.					
ASSESSED LEARNING OUTCOMES: (additional guidance below; please refer to the Programme Specification for relevant award/ programme Learning Outcomes. At the end of the module the learner will be expected to be able to:					
Assessed Module Learning Outcomes			Award/ Programme Learning Outcomes contributed to		
1. Demonstrate understanding of the purpose and structure of operating systems.			C8.1.1 GD8.1.1		

2. Understand and apply the principles of networking, protocols and associated technologies	C8.1.2 GD8.1.2
3. Specify the architecture of a typical business IT system	C8.1.3 C8.2.1, C8.3.3, C8.4.1, C8.4.2 GD8.1.3 GD8.2.1, GD8.3.3 GD8.4.1
4. Monitor system performance and recommend changes to manage load balance and avoid system failure	C8.2.2 C8.2.3, C8.2.4 C8.5.2 GD8.2.2 GD8.2.3 GD8.5.2
DATE OF APPROVAL: 18/09/2020	FACULTY/OFFICE: Academic Partnerships
DATE OF IMPLEMENTATION: XX/XX/XXXX	SCHOOL/PARTNER: Petroc
DATE(S) OF APPROVED CHANGE: XX/XX/XXXX	SEMESTER: Semester 2
Notes:	

Additional Guidance for Learning Outcomes:

To ensure that the module is pitched at the right level check your intended learning outcomes against the following nationally agreed standards

- Framework for Higher Education Qualifications <http://www.qaa.ac.uk/docs/qaa/quality-code/qualifications-frameworks.pdf>
- Subject benchmark statements <https://www.qaa.ac.uk/quality-code/subject-benchmark-statements>
- Professional, regulatory and statutory (PSRB) accreditation requirements (where necessary e.g. health and social care, medicine, engineering, psychology, architecture, teaching, law)
- QAA Quality Code <https://www.qaa.ac.uk/quality-code>

SECTION B: DETAILS OF TEACHING, LEARNING AND ASSESSMENT

Items in this section must be considered annually and amended as appropriate, in conjunction with the Module Review Process. Some parts of this page may be used in the KIS return and published on the extranet as a guide for prospective students. Further details for current students should be provided in module guidance notes.

<p>Summary of Module Content</p> <p>Object orientated techniques</p> <ul style="list-style-type: none"> • inheritance • polymorphism • association • interfaces • design principles • design patterns Professional standards <p>A range of approaches to testing e.g. unit testing, test-driven development, user experience</p> <ul style="list-style-type: none"> • Use of IDE and debugging • Security considerations • Xml documentation • Version control • Overview of UML 	

SUMMARY OF TEACHING AND LEARNING [Use HESA KIS definitions]		
Scheduled Activities	Hours	Comments/Additional Information (briefly explain activities, including formative assessment opportunities)
Lectures	10	
Supervised workshops	40	Practical labs where specific programming skills can be practised
Self-directed Study	150	
Total	200	(NB: 1 credit = 10 hours of learning; 10 credits = 100 hours, etc.)

SUMMATIVE ASSESSMENT

Element Category	Component Name	Component Weighting
Coursework	Design and implement an application	100% 100%
Practical	Presentation which explains approach to design, overall structure and key processes	100% 100%

REFERRAL ASSESSMENT

Element Category	Component Name	Component Weighting
Coursework	Design and implement an application	100%
		100%
Coursework in lieu of original assessment	Presentation with speaker notes which accompanies code and explains approach to design, overall structure and key processes	100%
		100%

To be completed when presented for Minor Change approval and/or annually updated	
Updated by: Date: XX/XX/XXXX	Approved by: Date: XX/XX/XXXX

**UNIVERSITY OF PLYMOUTH MODULE
RECORD**

SECTION A: DEFINITIVE MODULE RECORD. Proposed changes must be submitted via Faculty/AP Quality Procedures for approval and issue of new module code.

MODULE CODE: PETR2167		MODULE TITLE: Database Applications Development			
CREDITS: 20		FHEQ LEVEL: 5		HECOS CODE: I320	
PRE-REQUISITES: N/A		CO-REQUISITES: N/A		COMPENSATABLE: Y	
SHORT MODULE DESCRIPTOR: <i>(max 425 characters)</i> This module develops a sound understanding of how client server applications are developed and how an application interacts with stored data.					
ELEMENTS OF ASSESSMENT [Use HESA KIS definitions] – see <u>Definitions of Elements and Components of Assessment</u>					
E1 (Examination)	0%	C1 (Coursework)	100%	P1 (Practical)	0%
E2 (Clinical Examination)	0%	A1 (Generic assessment)	0%		
T1 (Test)	0%				
SUBJECT ASSESSMENT PANEL to which module should be linked: Computing					
Professional body minimum pass mark requirement: N/A					
MODULE AIMS: To introduce students to the concepts and issues concerning server-side applications interfacing multi-user, networked, relational databases and to provide a solid foundation in database programming.					
ASSESSED LEARNING OUTCOMES: (additional guidance below; please refer to the Programme Specification for relevant award/ programme Learning Outcomes. At the end of the module the learner will be expected to be able to:					
Assessed Module Learning Outcomes			Award/ Programme Learning Outcomes contributed to		
1. Write effective statements to define, manipulate and control data.			C8.2.1 C8.4.1		
2. Design a multi-user database application.			C8.1.2, C8.4.2C8.5.3		

3. Implement secure web solutions using appropriate technologies to integrate with datastores.	C8.1.3, C8.1.4 C8.2.2, C8.2.4
4. Implement a distributed API.	C8.3.1, C8.3.3C8.5.1
DATE OF APPROVAL: 18/09/2020	FACULTY/OFFICE: Academic Partnerships
DATE OF IMPLEMENTATION: XX/XX/XXXX	SCHOOL/PARTNER: Petroc
DATE(S) OF APPROVED CHANGE: XX/XX/XXXX	SEMESTER: AU
Notes:	

Additional Guidance for Learning Outcomes:

To ensure that the module is pitched at the right level check your intended learning outcomes against the following nationally agreed standards

- Framework for Higher Education Qualifications
<http://www.qaa.ac.uk/docs/qaa/quality-code/qualifications-frameworks.pdf>
- Subject benchmark statements <https://www.qaa.ac.uk/quality-code/subject-benchmark-statements>
- Professional, regulatory and statutory (PSRB) accreditation requirements (where necessary e.g. health and social care, medicine, engineering, psychology, architecture, teaching, law)
- QAA Quality Code <https://www.qaa.ac.uk/quality-code>

SECTION B: DETAILS OF TEACHING, LEARNING AND ASSESSMENT

Items in this section must be considered annually and amended as appropriate, in conjunction with the Module Review Process. Some parts of this page may be used in the KIS return and published on the extranet as a guide for prospective students. Further details for current students should be provided in module guidance notes.

ACADEMIC YEAR: 2021/22	NATIONAL COST CENTRE: 121
MODULE LEADER: Tim Barker	OTHER MODULE STAFF:
Summary of Module Content <ul style="list-style-type: none"> • Introduction to database environments • Relative merits • New technologies e.g. no SQL Review of legal and social issues • GDPR • Security SQL • Use a range SQL statements • Design implications of multi-user environment • Use appropriate design methodologies to meet the demands of a multi-user platform • Server-side programming • Use appropriate programming languages to create server-side products • Use OO methods to solve problems • Use of API • Create a distributed user application using appropriate methods and tools 	

SUMMARY OF TEACHING AND LEARNING [Use HESA KIS definitions]		
Scheduled Activities	Hours	Comments/Additional Information (briefly explain activities, including formative assessment opportunities)
Lectures	20	Underpinning theory SQL, multi-user environment, client-server
Workshops	30	Practical workshops
Self-directed Study	150	
Total	200	(NB: 1 credit = 10 hours of learning; 10 credits = 100 hours, etc.)

**UNIVERSITY OF PLYMOUTH MODULE
RECORD**

SECTION A: DEFINITIVE MODULE RECORD. Proposed changes must be submitted via Faculty/AP Quality Procedures for approval and issue of new module code.

MODULE CODE: PETR2168		MODULE TITLE: Emerging Technologies			
CREDITS: 20		FHEQ LEVEL: 5		HECOS CODE: I320	
PRE-REQUISITES: N/A		CO-REQUISITES: N/A		COMPENSATABLE: Y	
SHORT MODULE DESCRIPTOR: <i>(max 425 characters)</i> This module will give an introduction to a range of emerging technologies and provide students with the opportunity to experiment with practical examples.					
ELEMENTS OF ASSESSMENT [Use HESA KIS definitions] – see <i>Definitions of Elements and Components of Assessment</i>					
E1 (Examination)	0%	C1 (Coursework)	50%	P1 (Practical)	50%
E2 (Clinical Examination)	0%	A1 (Generic assessment)	0%		
T1 (Test)	0%				
SUBJECT ASSESSMENT PANEL to which module should be linked: Computing					
Professional body minimum pass mark requirement: N/A					
MODULE AIMS: The module covers relevant theories and concepts to analyse the strategic value of emerging technologies such as artificial intelligence, robotics, the Internet of Things and blockchain. Students will have the opportunity to experience practical applications of these technologies.					
ASSESSED LEARNING OUTCOMES: (additional guidance below; please refer to the Programme Specification for relevant award/ programme Learning Outcomes. At the end of the module the learner will be expected to be able to:					
Assessed Module Learning Outcomes			Award/ Programme Learning Outcomes contributed to		
1. Research the key underpinning theories and recent developments in a range of emerging technologies.			C8.2.4 C8.3.3 GD8.2.4 GD8.3.3		
2. Evaluate the legal, social and ethical impact of emerging technologies with particular emphasis on the workplace			C8.1.4 C8.3.4, C8.4.2 GD8.1.4, GD8.3.4		
3. Present a practical application of an emerging technology as a team			C8.3.1, C8.3.2, C8.4.3C8.4.4 GD8.3.1, GD8.3.2, GD8.4.3, GD8.4.4
