| Programme Specification | 4 |
| Module Records | |

Welcome to the FdA Early Childhood Studies delivered at North Devon and Mid Devon (Tiverton Campus) by Petroc, in partnership with the University of Plymouth.

The Foundation degree in Early Childhood Studies offers a comprehensive and in-depth knowledge of young children's development, and the provision of innovative practice to support students' learning. Students have many opportunities to apply theory to practice and to develop their understanding of key concepts. There are no examinations, but essays, presentations, case studies and reports contribute to the module grades. The transferable skills gained through the activities and study programme will enable students to apply for employment in a wide range of sectors; planning and managing projects, relating academic theory to their own practice, and working in teams are just some of these skills. All of the modules refer to the practical application of theory to work with children, with a number of modules offering the opportunity to plan and deliver professionally linked and relevant activities.

The development of graduate skills is a priority for all the teaching staff and a minimum of 50 hours of placement in an Early Years relevant workplace setting assists students to make links between theory and practice. Past students remark on the considerable personal development and growth that they gained through the teaching and learning they experience on the programme. By working closely with the staff on the progressing programmes, a smooth progression to the final year is ensured.

This programme has been designed to equip you with the skills and knowledge base required to work in your chosen specialism or other graduate opportunities. It is also a platform from which you can undertake additional vocational and academic qualifications.

This programme has been designed to equip you with the skills and knowledge base required to work in your chosen specialism or other graduate opportunities. It is also a platform from which you can undertake additional vocational and academic qualifications.

This Programme Quality handbook contains important information including:

- The approved programme specification
- Module records

Note: The information in this handbook should be read in conjunction with the current edition of:

- Your University Student Institution Handbook which contains student support based information on issues such as finance and studying at HE available at: https://www.plymouth.ac.uk/your-university/governance/student-handbook

programme. By working closely with the staff on the progressing programmes, a smooth progression to the final year is ensured.

This programme has been designed to equip you with the skills and knowledge base required to work in your chosen specialism or other graduate opportunities. It is also a platform from which you can undertake additional vocational and academic qualifications in order to excel in a wide range of professions.

3. Details of Accreditation by a Professional/Statutory Body (if appropriate)

N/A

- 4. Exceptions to Plymouth University Regulations (Note: Plymouth University's Academic Regulations are available on the extranet: <u>https://www.plymouth.ac.uk/student-life/academic-regulations</u>) None
 - Programme Aims

The programme will deliver:

- A:1 opportunity to acquire a variety of skills, concepts and learning experiences to enhance their employment potential and opportunities for further study and professional development. Students will be able to demonstrate skills and knowledge acquired in practical or professional experience across a number of modules, and are given the opportunity to apply theory to real-life settings.
- A:2 the opportunity to develop an ability to reflect upon an range of historical, philosophical, psychological, sociological, cultural and other perspectives, and consider how these influence understandings of children and childhood nationally and globally.
- A:3 the promotion of a reflective approach to practice and professional development, with students supported to identify areas of their own practice that could be developed and improved, and to critically reflect upon their own work and that of others.
- A:4 the opportunity for students to develop knowledge of the interrelated factors that affect children's development and learning in a variety of contexts. By studying social policy, Early Years practice, and provision, students are prepared to work with, support, and celebrate the diversity of families and children. Graduates will be reflective learners able to connect theory to practical experiences and situations in an Early Years workplace.
- A:5 preparation for learners to develop as advocates of children's rights and needs, and creatively implement policies set for best practice in working with young children and their families, demonstrating the ability to recognise and challenge inequalities in society, and to embrace an anti-bias curriculum

University of Plymouth Academic Partnerships Programme Quality Handbook UK 22/23 Page 6 of 56 Last Saved: 02/09/2021

- A:6 a grounding for those students who wish to take advantage of progressing to an honours degree programme, widening participation in Higher Education, supporting academic and professional skills.
- A:7 The opportunity for students to lead, support and work collaboratively with others and gain an understanding of working effectively in teams with parents, carers and other professionals

5. Programme Intended Learning Outcomes (ILO)

By the end of this programme the student will be able to:

- LO1: Analyse, critically evaluate, and demonstrate knowledge and understanding of the ecology of Early Childhood, and children in ecological contexts.
- LO2: Observe, record, interpret, and intelligently apply appropriate theoretical principles in research and Early Years Practice with young children.
- LO3: Reflect upon, and develop, their own practice in the light of theoretical knowledge, including the acquisition and development of key graduate or employability skills specific to the Early Years Sector.
- LO4: Evidence knowledge and understanding of children's rights, anti-discriminatory practice, and how to protect and promote those rights as an Early Years practitioner.
- LO5: Demonstrate key academic skills in order to confidently progress to further professional or academic achievement.
- LO6: Demonstrate a broad understanding of current UK Provision for young children.
- LO7: Evidence a critical understanding of the challenges and intricacies within multiprofessional practices, evidencing and reflecting upon the ability and key skills necessary to work in teams.

Distinctive Features

The Foundation degree offered in Early Childhood Studies is an important feature in the local Early Years sector: offering practitioners a chance to formalise and improve on their skills and to develop their career paths. The qualification appeals both to those already working in the sector, returning to work and progressing from full-time education, offering both the breadth of knowledge that the broader subject focus allows, while giving the opportunity for specialism and a focused career path into BA (hons) degree progression and post-graduate study. The majority of our students progress to the full honours degree via a number of progression pathways and remain in the local workforce: as managers, teachers, health workers, and pedagogues.

All of the modules refer to the practical application of theory in working with children. A number of modules offer the opportunity to plan and deliver activities in professional settings. The development of graduate skills is a priority for all the teaching staff that many past students remark upon, noting the considerable personal development and growth that they gained through the teaching and learning they experience on the programme

The FdA Early Childhood Studies is the preferred choice for those who see their professional progression in the wider field of Early Years, as opposed to a definite focus on Primary or Early Years teaching, or who want to study a broad base of relevant modules without yet being ready to decide on a definite career path within the Early Years sector. The wealth of opportunities to investigate potential careers, make local professional links, and extend professional knowledge makes this foundation degree an ideal choice for learners whose interests extend across the range of disciplines, professions, and specialisms when working with children and families in the Early Years.

6. Student Numbers

The following provides information that should be considered nominal, and therefore not absolutely rigid, but is of value to guide assurance of the quality of the student experience, functional issues around enabling progression opportunities to occur and staffing and resource planning:

Minimum student numbers per stage = 5

Target student numbers per stage = 15

Maximum student numbers per stage = 25 (groups may be larger for core key module lectures)

7. Progression Route(s)

On completion of the FdA Early Childhood Studies, students will have several progression opportunities including completing their Honours degree with Plymouth University, post-graduate study within Plymouth University and employment in the Early Years sector.

Students who successfully complete the FdA Early Childhood Studies may progress to the following:

BA (Hons) Early Childhood Studies (entry at Level 6) – University of Plymouth BA (Hons) Professional Development (Early Childhood Studies) (delivered at Petroc) (entry at Level 6)

BA (Hons) Education (entry at Level 6) - University of Plymouth

The contribution of marks from prior levels of study to the progression award is governed by University regulations.

8. Admissions Criteria

| Qualification(s) Required for Entry to this Programme: | Details: |
|--|---|
| Level 2: 1. Key Skills requirement / Higher Level Diploma: and/or | Grade 'C' or above in Maths and English preferred, but not necessary in some instances: relevant key skills qualifications or functional skills qualifications would be acceptable. |
| 2. GCSEs required at Grade C or above: | |
| Level 3: at least one of the following: | A-levels OR vocational qualification (160 UCAS tariff points) or substantial and relevant work experience in an appropriate sector. Entry is welcome from mature students with relevant experience in place of these qualifications |
| AS/A Levels Advanced Level Diploma: | |
| 5. BTEC National Certificate/Diploma: | Appropriate subject areas will normally be in the discipline of Children's care |
| 6. VDA: AGNVQ, AVCE, AVS: | and development, Education, Psychology, Sociology, Health and Social care, and related subjects however qualifications in others subjects may be |
| 7. Access to HE or Year 0 provision: | considered and discussed at interview. |
| 8. International Baccalaureate: 9. Irish / Scottish Highers / Advanced Highers: | |
| Work Experience: | Considered on individual merit |
| Other HE qualifications / non-standard awards or experiences: | Appropriate subject areas will normally be in related disciplines, however qualifications in others subjects may be considered and discussed at interview. |

| APEL / APCL ⁴ possibilities: | Applicants for APEL/APCL will be dealt with on an individual basis. Students must apply for this through the Higher Education Office providing full details of the qualifications/experience they wish to be considered. Plymouth University regulations will apply to all applications. |
|--|---|
| Interview / Portfolio requirements: | In order to continue the ethos of widening participation that is established in our FdA and FdSc programmes of study we feel that applicants with a proven record of experience in related subjects at the correct level and who can demonstrate relevant experience through portfolio plus an interview may be eligible to enter the award. All relevantly qualified applicants will be interviewed. All students will be expected to complete 50 hours of work-based study as a minimum requirement, and we suggest that this represent around one day in an appropriate setting in term time in your first years of study. Students should come to interview with some initial plans of how they intend to undertake this work-based learning, though the programme can offer some support in gaining placements if the applicant does not have an existing professional role in the Early Years. |
| Independent Safeguarding Agency (ISA) / Disclosure and Barring Service (DBS) clearance required: | Students will be asked to fund a portable DBS check or provide evidence of clearance already held. This can be processed through Petroc. |

⁴ Accredited Prior Experiential Learning and Accredited Prior Certificated Learning University of Plymouth Academic Partnerships Programme Quality Handbook UK 22/23 Page **10** of **56** Last Saved: 02/09/2021

10. Academic Standards and Quality Enhancement

The Programme Leader/Manager (or other descriptor) leads the Programme Committee in the following of Plymouth University's annual programme monitoring process (APM), as titled at the time of approval. APM culminates in the production, maintenance and employment of a programme level Action Plan, which evidences appropriate management of the programme in terms of quality and standards. Any formally agreed change to this process will continue to be followed by the Programme Leader/Manager (or other descriptor) and their Programme Committee.

Elements of this process include engaging with stakeholders. For this definitive document it is important to define:

Subject External Examiner(s): The FdA Early Childhood Studies has two External Examiners that work across the FdA Early Childhood Studies, FdA Early Years Practice, and the FdA Teaching and Learning, each has responsibility for the specialist modules on each course and between them they cover the common modules.

Additional stakeholders specific to this programme: Student representation via an elected student representative will be a core method of obtaining objective feedback and constructive input on all elements of the student cohort experience whilst on the programme.

The student representative (s) will be involved in both the Autumn and Spring programme committee meetings, where they will have an opportunity to meet with both the programmes External Examiner and the Academic Liaison Person. The input of the student representative will be an integral part of the quality assurance process for this programme of study. In addition to the course student representative, Petroc has a lead student representative who arranges regular student representative meetings where information from both the Petroc HE Coordinator and the student representatives is disseminated in a meaningful and productive manner in order to improve the whole Higher Education experience for students at Petroc.

11. Explanation and Mapping of Learning Outcomes, Teaching & Learning and Assessment⁵

Developing graduate attributes and skills, at any level of HE, is dependent on the clarity of strategies and methods for identifying the attributes and skills relevant to the programme and where and how these are operationalized. The interrelated factors of Teaching, Learning and Assessment and how these are inclusive in nature, are fundamentally significant to these strategies and methods, as are where and how these are specifically distributed within the programme.

Ordered by graduate attributes and skills, the following table provides a map of the above, plus an exposition to describe and explain the ideas and strategy of each. Therefore, subsequent to the initial completion for approval, maintenance of this table as and when programme structure changes occur is also important:

| FHEQ level: Level Four | | | | | |
|--|---|----------------|--|-------------------------|-----------------------------------|
| Definitions of Graduate Attributes and Skills Relevant to this Programme | Teaching and Learning Strategy / Methods | Prog Aims | Prog intende d Learnin g Outcom es | Range of Assessments | Related <u>Core</u> Modules |

An explanation for embedding Knowledge and Understanding through Teaching & Learning and Assessment at this level of the programme:

Assessment is carried out through a variety of methods such as, case studies, coursework, essays, presentations, academic posters, reflective logs, workplace engagement, literature reviews etc. Formative work in each module will also be undertaken to ensure that students are fully prepared for the summative assessments. All lecturers will ensure that students have the opportunity to practice on more than one occasion the type of assessment required in each module.

Clear and effective written and verbal communication skills are developed throughout the two years through the formative assessment of written and oral work.

This work may take a variety of forms- essays, debates, presentations, reflective logs, practical assessments and presentation of reports or ideas.

At the commencement of the course, the attention of students will be drawn to the need for effective written and verbal communication in induction and this will be further developed through seminars and students own independent study, supported through comprehensive workshops and lecture sessions.

Group work is encouraged via a range of practical tasks and activities embedded across all the modules. Formative assessment will take place in all modules to ensure students understand what is required of them and peer and self-assessment will play a considerable role, how to critically evaluate theirs and others performance, build on that knowledge and develop practice.

| By the end of this level of this programme the students will be able to demonstrate for a threshold pass: The ability to critically explore and examine cultural and historical features surrounding children and childhood. Demonstrate knowledge of, and ability to plan, for the assessment, evaluation and the creation and support of improved learning opportunities for young children. Demonstrate the ability to recognise and challenge inequalities, and to embrace an anti-bias curriculum. Reflect upon the ethics, both of research and practice with children and families. Generate and explore hypotheses and research questions relating to young children. | Primary: Lectures and seminars will be used to introduce and teach certain components of all modules. Subject specific of the programme will require reference to peer reviewed journals together with lectures and seminars delivered by subject specialist teams. Tutorial support will be delivered, with a focus on pastoral and study support. Specific workshops for research of literature and critically reviewing that literature are run by the dedicated HE Learning Resources team. | A1 A2 A5 A6 | LO1 LO2 LO3 LO5 LO1 LO1 LO3 LO4 LO6 | Literature review and research Evaluation of literature Research proposal Annotated Bibliography Storytelling activity Essays Presentation on planned activity Annotated response to | NORD21 23 NORD21 24 NORD21 27 NORD21 27 NORD21 28 NORD21 28 NORD21 25 NORD21 25 NORD21 25 NORD21 23 |

An explanation for embedding Knowledge and Understanding through Teaching & Learning and Assessment at this level of the programme:

Students will develop on their work during the first year, with a focus on developing knowledge & understanding of core concepts. This will be facilitated by workshops enabling students to research effectively, the lectures and seminars, and the developing ability for students to direct their own study. There will be further reliance upon the use of primary sources, particularly peer-reviewed journals, to form core parts of their assessments and materials used in class. Students will engage with a range of different teaching methods, such as lectures and seminars to introduce topics, with group work and formative assessment and feedback enabling constructive developmental feedback.

Assessment is carried out through a variety of methods such as: case studies, coursework, essays, presentations, reflective logs, workplace engagement, literature reviews etc. Formative work in each module will also be undertaken to ensure that students are fully prepared for the summative assessments. All lecturers will ensure that students have the opportunity to practice on more than one occasion the type of assessment required in each module.

| By the end of this level of this programme the students will be able to demonstrate for a threshold pass: Students will be able to demonstrate an ability to apply underlying concepts and principles outside the context in which they were first studied. In particular: Apply knowledge of theory when interpreting experiences. Use experiences to understand theory and reflect on practice. Analyse and interpret observations and assessment in the light of theory. Problem solving and research skills. An ability to identify, recognise and apply key theories, paradigms, concepts and principles. Demonstrate a critical understanding of the links between key themes: ethics, politics, culture and ideology. | Primary: Lectures will act as introductions to learning outcomes, to establish a firm knowledge base. This will be further developed by the use of seminars to embed and develop the analysis and critical viewpoints and awareness. The use of journals will also enable students to synthesis and establish a core competency of understanding. Tutorial support will be delivered, with a focus on pastoral and study support. Further opportunities for work-based learning will enable students to develop their critical thinking and critical skills Secondary/Suppleme ntary: | A4 A2 A6 A3 | L01 L02 L07 L03 L05 L04 L06 L07 | Reflective accounts Written evaluation and plans of practice Planned activities and sessions, reflection on plans. An explanation for embedding Cognitive and Intellectual Skills through Teaching & Learning and Assessment at this level of the programme:

The key components of description, analysis, critical evaluation and synthesis will be further developed by a range of critical seminars, guest speakers, and relation to real-world scenarios to establish the theory within the range of professional settings applicable.

Assessment is carried out in a variety of ways to prevent over emphasis on one or two particular skills and to accommodate a range of skills and learning styles. Problem solving, planning, evaluation and critical evaluation, using the skills in oral applications and through coursework will judge and support the students' developing skills and also allow the students to be assessed in a balanced way.

Students are supported and encouraged to develop their own lines of enquiry and thinking, in pursuing areas of particular interest, selecting their own choice of literature for assignments such as NORD2123, NORD2124 and identifying areas relevant to their own practice in NORD2125 and NORD2128.

An explanation for embedding Key Transferable Skills through Teaching & Learning and Assessment at this level of the programme:

Clear and effective written and verbal communication skills are developed throughout the two years through the formative assessment of written and oral work. This work may take a variety of forms: essays, debates, presentations, reflective logs, presentation of reports, responses to articles or case studies and in more innovative methods of assessment, such as the response to professional standards and specifications, designing of provision and practice or presenting an artefact, and research proposals. At the commencement of the course, the attention of students will be drawn to the need for effective written and verbal communication in induction and this will be further developed through seminars and students own independent study, supported through comprehensive workshops and lecture sessions.

Information Technology will be enabled via the VLE, use of appropriate software.

Formative assessment will take place in all modules to ensure students understand what is required of them while peer and selfassessment will play a considerable role.

SUMMARY of MODULE CONTENT

Working in assigned groups, students have the freedom to identify, design, and carry out a small project working with outside agencies as relevant. Reflection on this experience with links made to theories of interpersonal communication, personal motivation, leadership, personality, and professional practice will form the main assessment. Students are also required to appraise both their own performance and that of their peers, with this 'peer review' comprising part of their eventual grade for the module.

| Scheduled Activities | Hours | Comments/Additional Information |

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Health, Education and Society

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

- To enable students to develop a comprehensive portfolio of evidence that supports their career development and practice.
- To enable students to demonstrate an approach to their practice that is informed by up to date and relevant theoretical perspectives.
- To support students in developing as autonomous learners

ASSESSED LEARNING OUTCOMES: (additional guidance below)

At the end of the module the learner will be expected to be able to:

- 1. Demonstrate how relevant theoretical perspectives have informed and enhanced your practical experience and/or knowledge within your subject area (LO1)
- 2. Plan for, reflect upon, and demonstrate with evidence from own practice, the ability to work independently and in a team, using effective communication skills (LO2)
- 3. Evaluate your weaknesses and strengths in relation to your experiential learning. Plan for the development of skills towards your career goals. Reflect upon fulfilling your potential role within the work place/organisation (LO3)
- 4. Demonstrate an ability to identify, locate, analyse, correctly acknowledge, and use information within their subject area (LO4)

SUMMARY of MODULE CONTENT

Through a series of tutorials, and specialist referral as necessary, students will be introduced to:

- Academic literacy and research conventions in their chosen field;
- The requirements of professional practice
- Informed reflection, self-evaluation and personal action planning; •
- Relevant ICT competences to support academic and professional practice; •
- Information Literacy, including search strategies, identification and critical selection of quality scholarly information.

| SUMMARY OF TEACHING AND LEARNING | - | |
|---|------------|---|
| Scheduled Activities | Hours | Comments/Additional Information |

SUMMARY of MODULE CONTENT

Examining the current framework of policy, legislation, and provision for young children in the UK, this module will ask students to critically examine political policy and influence, the role of state and parents, the Rights of children, and the efficacy of current protection and provision in childhood.

SUMMARY of MODULE CONTENT

Students will explore the key thinkers and ideological approaches shaping Early Years educational provision in the UK. They will compare UK provision with international provision, and will conduct educational research to discover which factors shape this provision in a self-selected nation.

SHORT MODULE DESCRIPTOR: (max 425 characters)

This module allows students to make an in-depth study of a particular area of interest relevant to Education, Children, or the Early Years. Using their research skills, students will compile a literature review in a chosen topic, negotiated with the module leader, preparing themselves for future academic progression.

| ELEMENTS OF ASSESSMENT Use HESA KIS definitions] | | | | | | | |
|--|----------|-------------------------|-------|----------------|-----|--|--|
| WRITTEN EXA | MINATION | COURSEWORK | | PRACTICAL | | | |

| Examination) | | | | | | | |
| T1 (Test) | % | | | | | | |

SUBJECT ASSESSMENT PANEL Group to which module should be linked: Health, Education and Society

Professional body minimum pass mark requirement: N/A

MODULE AIMS:

- To allow for in-depth study of a topic of a student's choice.
- To develop independent work habits and research skills.
- To facilitate the production of a critical exploration of an area of educational importance.
- To develop and hone skills in identifying, finding, and critically evaluating secondary research in order to compile a comprehensive literature review.

ASSESSED LEARNING OUTCOMES: (additional guidance below)

At the end of the module the learner will be expected to be able to:

- 1. Demonstrate an appropriate level of conceptual understanding in their chosen area (LO1)
- 2. Demonstrate an appropriate knowledge of the literature pertinent to their chosen question (LO2)
- 3. Present findings in a recognised academic format as a literature review (LO3)

SUMMARY of MODULE CONTENT

After a series of lectures and discussions, students will have the opportunity to investigate a focus of professional interest. The compilation of an annotated bibliography indicating their extended understanding with form the focus of a final reflective account where rich links between theory and practice can be established.
